thirteenth century motets and the third largest of motets in French it is one of only two sizable sets of polyphonic motets preserved in provincial songbooks rather than Parisian collections a fact that broadly affects the style of several groups of its motets finally it transmits an unusually high number of unica due to the anthology's inclusion in an Artesian chansonnier Although the Chansonnier de Noailles has sparked the interest of bibliophiles and scholars since the first half of the eighteenth century its faulty polyphonic notation has made editing the motets difficult past editions have thus been incomplete and relied heavily upon concordant readings This volume presents the music and texts with translations into English of the motets from the Chansonnier de Noailles for the first time published in a single coordinated comprehensive critical edition
