

"Sam Rocha's primer reminds me of a French adage: *la philo descend dans la rue*—philosophy comes to the street. Rocha's little book can be read and talked about, with profit, on the street, in the home, in the school, in the garden, anywhere the human heart beats and the human mind thinks."

—David T. Hansen

Winburg Professor in the History and Philosophy of Education,
Teachers College, Columbia University

"Rocha gives us a compelling experience of first-hand philosophizing, in which the ordinary is shown in its powerful features, and the discipline of philosophy of education reclaims its necessity."

—Cristina Cammarano

Assistant Professor of Philosophy,
Salisbury University

"What more is education than schooling? What more is philosophy than knowledge of philosophers? By exploring how education is synonymous with life itself, and philosophy with a kind of love, Sam Rocha illuminates how these two pursuits nourish understanding. In crystal clear yet poetic language, he reminds us that what is at stake in them is nothing less than the possibility of joy. His marvelous primer is addressed not to experts or trainees, but to the soul in us all."

—Rene Arcilla

Professor of Philosophy of Education,
Steinhardt School of Culture, Education, and Human Development,
New York University

"An elegantly written invitation to students and the general reader to a frame of mind where one is ready to learn from and think about philosophy and education. Sam Rocha calls us all back, in heart-felt yet precise prose, to philosophy's ancient role of dialogue, wonder, and reflection. A joy to read and treasure."

—AG Rud

Distinguished Professor,
Washington State University

Samuel D. Rocha is Assistant Professor of Philosophy of Education at the University of British Columbia.

Case Method and Pluralist Economics Kavous Ardalan, 2017-12-09 This book discusses the relationship between pluralist economics and the case study method of teaching advocating the complimentary use of both to advance economics education Using a multi paradigmatic philosophical frame of analysis the book discusses the philosophical methodological and practical aspects of the case study method while drawing comparisons with those of the more commonly used lecture method The book also discusses pluralist economics through the exposition of the philosophical foundations of the extant economics schools of thought which is the focal point of the attention and admiration of pluralist economics More specifically the book discusses the major extant schools of thought in economics Neo Classical Economics New Institutional Economics Behavioral Economics Austrian Economics Post Keynesian Economics Institutional Economics Radical Economics and Marxist Economics and emphasizes that these schools of thought in economics are equally scientific and informative that they look at economic phenomena from

their certain paradigmatic viewpoint and that together they provide a more balanced understanding of the economic phenomenon under consideration Emphasizing paradigmatic diversity as the cornerstone of both the case method and pluralist economics the book draws the two together and makes an effective case for their combined use A rigorous multi faceted analysis of the philosophy methodology and practice of economics education this book is important for academicians and students interested in heterodox economics philosophy and education A Primer in Philosophy of Education: Philosophies of Education in Historical Perspective Walter J. Cass,1974 *Philosophical Research in Education* Samuel D. Rocha,2022-11-14 Is there room for philosophy in educational research Where is phenomenology before and beyond its uses and abuses in the applied and social sciences How are phenomenology and philosophy of education related What are the methods of phenomenology within the field of philosophy of education These talks to educational scholars and researchers respond to these questions and make an appeal for the place of philosophy within educational research and the tradition of phenomenology within philosophy of education Across a broad genealogy of thought with frequent substitutions and autobiographical confessions these lectures work from and towards a simple article of faith philosophy and education are not so different Art's Teachings, Teaching's Art Tyson Lewis,Megan Laverty,2015-08-28 This volume examines the interface between the teachings of art and the art of teaching and asserts the centrality of aesthetics for rethinking education Many of the essays in this collection claim a direct connection between critical thinking democratic dissensus and anti racist pedagogy with aesthetic experiences They argue that aesthetics should be reconceptualized less as mere art appreciation or the cultivation of aesthetic judgment of taste and more with the affective disruptions phenomenological experiences and the democratic politics of learning thinking and teaching The first set of essays in the volume examines the unique pedagogies of the various arts including literature poetry film and music The second set addresses questions concerning the art of pedagogy and the relationship between aesthetic experience and teaching and learning Demonstrating the flexibility and diversity of aesthetic expressions and experiences in education the book deals with issues such as the connections between racism and affect curatorship and teaching aesthetic experience and the common and studying and poetics The book explores these topics through a variety of theoretical and philosophical lenses including contemporary post structuralism psychoanalysis phenomenology critical theory and pragmatism The Philosophy of Education Charles Albert Baatz,1980

Philosophy of Education John Percival Powell,1974 **From Socrates to Summerhill and Beyond** Ronald Swartz,2016-06-01 In *From Socrates to Summerhill and Beyond Towards a Philosophy of Education for Personal Responsibility* Ronald Swartz offers an evolving development of fallible liberal democratic self governing educational philosophies He suggests that educators can benefit from having dialogues about questions such as these

- 1 Are there some authorities that can be consistently relied upon to tell school members what they should do and learn while they are in school
- 2 How should the imagination of social theorists be both used and checked in the development and implementation of

innovative educational reforms 3 How can teachers in personal responsibility schools help their students learn These questions are representative of problems that Swartz raises in his book Swartz identifies four educational programs as personal responsibility schools These are Little Commonwealth Homer Lane Summerhill A S Neill Orphans Home Janusz Korczak and Sudbury Valley School Daniel Greenberg Swartz then suggests that these learning environments create social institutions that are liberal democratic and self governing and therefore endorse the policy of personal responsibility This policy states All school members students included are fallible authorities who should be personally responsible for determining their own school activities and many policies that govern a school Schools which incorporate this policy can interchangeably be referred to as personal responsibility self governing or Summerhill style schools In providing an historical and philosophical understanding of Summerhill style schools Swartz suggests that these educational alternatives have intellectual roots in the ideas associated with Socrates as portrayed in Plato s Apology Specifically in personal responsibility schools teachers are not viewed as authorities who attempt to transmit wisdom to their students Rather self governing schools follow the Socratic tradition which claims that teachers can be viewed as fallible authorities who attempt to engage students in dialogues about questions of interest to students The interpretation of Plato s works used by Swartz can be found in Karl Popper s The Open Society and Its Enemies Swartz has also been significantly influenced by the educational writings of Bertrand Russell and Paul Goodman Goodman s Compulsory Miseducation makes it clear that schools which follow in the tradition of Summerhill compete with the educational programs that are an outgrowth of John Dewey s writings In summary Swartz s book aims to engage educators in dialogues that will lead to improved educational theories and practices

Philosophy and History of Education Antoinette Errante, Jackie Blount, Bruce A. Kimball, 2017-02-10 The studies of philosophy and history of education are under siege These studies do not attract large grant funds and to many do not seem useful even while much of educational research is dismissed as inconsequential or self evident and the crisis in American education deepens Philosophy and history of education have therefore been pushed to the margin or beyond in colleges and schools of education commensurate with the decline of the humanities in higher education generally Philosophy and History of Education examines the complex relationship between these studies and the value of these related studies for improving educational knowledge policy and practice From diverse perspectives the philosophers and historians in this volume explore how bringing these disciplines together yields insights about unacknowledged or occult aspects of education problems that neither could achieve on their own
