A Public God Natural Theology Reconsidered:

A Public God Neil Ormerod, 2015-01-01 Natural theology is a philosophical site that is hotly debated and controversial it is claimed by Roman Catholics Protestants and Evangelicals as a crucial vantage point for the intersection of theology philosophy science and politics It is strongly contested by some theologians such as those influenced by Barth as well as some philosophers and scientists This volume steers through these troubled waters arguing for reclamation of a natural theology that withstands the challenges from within and without the Christian tradition and accrues to a vital public and political witness

Re-Imagining Nature Alister E. McGrath, 2016-08-01 Reimagining Nature is a new introduction to the fast developing area of natural theology written by one of the world's leading theologians The text engages in serious theological dialogue whilst looking at how past developments might illuminate and inform theory and practice in the present This text sets out to explore what a properly Christian approach to natural theology might look like and how this relates to alternative interpretations of our experience of the natural world Alister McGrath is ideally placed to write the book as one of the world's best known theologians and a chief proponent of natural theology This new work offers an account of the development of natural theology throughout history and informs of its likely contribution in the present This feeds in current debates about the relationship between science and religion and religion and the humanities Engages in serious theological dialogue primarily with Augustine Aquinas Barth and Brunner and includes the work of natural scientists philosophers of science and poets

Neanderthal Religion? Thomas Hughson, 2024-06-20 Neanderthals are the most researched extinct members of genus Homo They have been gone for between 28 000 and 40 000 years far beyond the reach of cultural memories An expanding number of archaeologists conclude that Neanderthals are as genetics confirms co human with us whose lineage emerged in Africa about 300 000 years ago Were they the same as us No Do archaeological discoveries of tools and behavioral clues indicate what may have been Neanderthal religion Taking religion as spirituality realized in common Hughson answers the controversial question with a conjecture assisted by anthropology Neanderthals were hunter gatherer animists associated with bears burials defleshed bones and care for invalids Hughson goes further exploring a theology of Neanderthal animism He argues it was an early non verbal revelation of the divine Experiential consciousness of being alive meshed with all living things in one web of life that exceeded any living individual Neanderthals encountered the source of being alive filtered through nature and the cosmos Far from complete the encounter may have had an acuity lost to

modernity and many Christians The book concludes by relating Neanderthal religion to special revelation and biblical faith with attention to the Gospel of John on the divine Logos and Aquinas on divine immanence The Redeemed Good Defense Anthony MacPherson, 2021-07-06 Why God Everyday this question is uttered in sorrow bewilderment or anger This cry is the problem of suffering It is also known as the problem of evil It asks why a good all powerful God allows evil and pain Theodicy is the name of the theological responses that seek to defend God against charges of unfairness Traditional theodicies have been accused of intensifying the problem by claiming that God is justified in allowing evil because he uses it to bring about a greater good This greater good approach has been criticized in more recent times It seems to uncomfortably align God and evil too closely together Does God need evil in order to bring good This study explores an alternative stream of theodicy found in the idea of cosmic warfare In this theodicy God fights evil in its moral physical spiritual and supernatural forms This book explores the world of theodicy and its cosmic warfare forms It navigates the theological and ethical minefields involved Building on the idea that God is in the midst of a great cosmic controversy it seeks to further the conversation and articulates a new alternative redeemed good defense *A New Awareness* Dominic Arcamone, 2024-02-29 A New Awareness is an endeavor of affection and generosity toward Sebastian Moore The book examines his key theological insights and themes over seventy years and proposes that they are still relevant today for the Christian Community He was a theologian and poet He wrote about many theological topics the significance of Jesus the experiences of the disciples and their meaning for us redemption the Trinity sexuality and ecclesiology and original sin But he is mainly known for being the theologian of desire self love to self gift desire is love trying to happen to be myself for another and the insight that there is no more wonderful reality than to be desired by the one you desire **Integral Ecology and the Fullness of Life** Anthony J. Kelly, 2018 Explores the horizon in which a new sense of conscious connections with the biosphere of this earth the encompassing cosmic reality and the singularity of Christian revelation might come to expression Light in Darkness Kelly, Anthony J., CSsR, 2020 Light in Darkness re centers theology in God as the focus of the enormous efforts of research in current scholarship It addresses the way the topic of God is treated or not treated in both cultural and religious circles and even its comparative absence in church communications **Conversion as Transformation** Dominic Arcamone, 2020-01-29 The process of human transformation is complex and ongoing This book presents a framework for understanding human transformation through the insights of Bernard Lonergan The reader will be introduced to terms such as the turn to the subject consciousness subjectivity and intersubjectivity It will explore terms such as horizon feelings values self esteem sublation conversion dialectic and religious experience The book explores transformation through the way mentors have authored their own lives told their own stories and taken possession of their interiority Transformation is illustrated through the lives of saints and ordinary men and women who did extraordinary things such as St Augustine Dag Hammarskjöld Vaclav Havel Franz Jaggerstatter St Therese of Lisieux Fredrich Nietzsche Katherine Ann Power and Marie Cardinal

Transformation is also illustrated through the medium of cinema *Babette's Feast* *The Mission* *As It Is in Heaven* *Romero* *Dead Poets Society* *Ordinary People* *The Godfather* trilogy *Three Color* trilogy *The Lord of the Rings* trilogy *Dial M for Murder* and *Twelve Angry Men* While the book treats religious moral affective intellectual and psychic conversion as moments of transformation it argues that ecological conversion requires all of these so as to meet the most serious moral challenge of our time

Political Economy as Natural Theology Paul Oslington, 2017-07-28 Since the early 20th century economics has been the dominant discourse in English speaking countries displacing Christian theology from its previous position of authority This path breaking book is a major contribution to the interdisciplinary dialogue between economics and religion Oslington tells the story of natural theology shaping political economy in the late 18th and early 19th centuries emphasising continuing significance of theological issues for the discipline of economics Early political economists such as Adam Smith Josiah Tucker Edmund Burke William Paley TR Malthus Richard Whately JB Sumner Thomas Chalmers and William Whewell extended the British scientific natural theology tradition of Francis Bacon Robert Boyle and Isaac Newton to the social world This extension nourished and shaped political economy as a discipline influencing its theoretical framework but perhaps more importantly helping legitimate political economy in the British universities and public policy circles Educating the public in the principles of political economy had a central place in this religiously driven program Natural theology also created tensions especially reconciling economic suffering with divine goodness and power that eventually contributed to its demise and the separation of economics from theology in mid 19th century Britain This volume highlights aspects of the story that are neglected in standard histories of economics histories of science and contemporary theology *Political Economy as Natural Theology* is essential reading for all concerned with the origins of economics the meaning and purpose of economic activity and the role of religion in contemporary policy debates
