Learning Through Teaching Mathematics Roza Leikin, Rina Zazkis, 2010-04-10 The idea of teachers Learning through Teaching LTT when presented to a naïve bystander appears as an oxymoron Are we not supposed to learn before we teach After all under the usual circumstances learning is the task for those who are being taught not of those who teach However this book is about the learning of teachers not the learning of students It is an ancient wisdom that the best way to truly learn something is to teach it to others Nevertheless once a teacher has taught a particular topic or concept and consequently truly learned it what is left for this teacher to learn As evident in this book the experience of teaching presents teachers with an exciting opportunity for learning throughout their entire career This means acquiring a better understanding of what is being taught and moreover learning a variety of new things What these new things may be and how they are learned is addressed in the collection of chapters in this volume LTT is acknowledged by multiple researchers and mathematics educators In the first chapter Leikin and Zazkis review literature that recognizes this phenomenon and stress that only a small number of studies attend systematically to LTT processes The authors in this volume purposefully analyze the teaching of mathematics as a source for teachers own learning

The Broken Cisterns of African American Education M. Christopher Brown, RoSusan D. Bartee, 2008-12-01 The failure of American education to achieve racial diversity has resulted from the inability of educational researchers policy makers and judicial officials to disentangle the complex definitions that have emerged in a post segregated society More specifically the capricious aim of post segregated educational settings leads to the confusing and often conflicting interchangeable usage of terms desegregated integrated and diversity This ambiguity is further confounded by the imprecise definitions of equity equality and opportunity The proposed book will examine the role of language post Brown v Board of Education and the effects of that language on educational policy and practice He also examines how the fundamental implications of language within post Brown court cases in pre through post secondary education demonstrate the unspecified outcomes for desegregation and integration while concomitantly demand an educational continuum of equitable distribution The arguments will further interrogate how education policy and practices implicitly contain a scholarly roadmap to forge equal opportunity and access fifty years after Brown
