Response to Intervention RtI involves evaluating the degree that students a master academic material in response to effective instruction and b demonstrate appropriate prosocial behavior in response to effective classroom management When students are not progressing or responding academically or behaviorally to effective instructional conditions RtI includes a functional assessment problem solving process to determine the reason s for the lack of success and the implementation of strategic through intensive interventions to help those students progress and be successful At an operational level RtI is often described as working within a flexible three tiered system that is guided by students academic and behavioral outcomes The goal ultimately is to facilitate learning and mastery by ensuring effective instruction and classroom management for all students Tier 1 and by speeding early and effective interventions to those students who need more strategic interventions Tier 2 or more intensive interventions Tier 3 interventions see the diagram below Critically effective RtI processes focus on a interventions not diagnostic labels b individualized functional assessment not universal or standard assessment batteries tests or evaluation protocols and c student focused contextual decision making not rigid psychometric decision rules At the core of this process is a data based functional assessment problem solving process While there are many sound problem solving models and processes all of the effective ones have four primary components Problem Identification Problem Analysis Intervention and Evaluation While some utilize more steps or different semantic terms all of the research based models components can be distilled down to these four primary components From an RtI perspective it is critical to note that RtI is an evaluation step That is it is impossible to determine whether a student has responded to an intervention if the intervention has not already been implemented This Electronic Book E Book focuses on describing the critical components of effective RtI systems and approaches at the school district and state levels as well as the step by step the Data based Functional Assessment Problem Solving process that has been used nationally by Project ACHIEVE as the SPRINT School Prevention
