Chapter 1 Part 2 200-100 engine

Fig. 1-100 Spark plug

When the engine is running, the spark plug should be checked for proper gap and condition. If the gap is too wide, it will cause a misfire. If the gap is too narrow, it will cause a hard start. The spark plug should be replaced if it is worn or damaged.

The spark plug is a critical component of the engine. It is responsible for igniting the fuel mixture in the cylinder. A properly gapped and maintained spark plug will ensure efficient combustion and optimal engine performance.
