Reader's Guide to American History Peter J. Whistlestop John Dickerson, 2016-08-02 From Face the Nation moderator and contributing editor for The Atlantic John Dickerson come the stories behind the stories of the most memorable moments in American presidential campaign history The stakes are high The characters full of striving and ego Presidential campaigns are a contest for control of power in the most powerful country on earth The battle of ideas has a clear end with winners and losers and along the way there are sharp turning points primaries debates conventions and scandals that squeeze candidates into emergency action frantic grasping and heroic gambles As Mike Murphy the political strategist put it Campaigns are like war without bullets Whistlestop tells the human story of nervous gambits hatched in first floor hotel rooms failures of will before the microphone and the cross country crack ups of long planned stratagems At the bar at the end of a campaign day these are the stories reporters rehash for themselves and embellish for newcomers In addition to the familiar tales Whistlestop also remembers the forgotten stories about the bruising and reckless campaigns of the nineteenth century when the combatants believed the consequences included the fate of the republic itself Some of the most modern feeling elements of the American presidential campaign were born before the roads were paved and electric lights lit the convention halls or there were convention halls at all Whistlestop is a ride through the American campaign history with one of its most enthusiastic conductors guiding you through the landmarks along the way

**My Country, 'tis of thee! The United States of America: Past, Present and Future** Willis Fletcher Johnson, 2020-09-28 BEGINNING with the year 1492 the date of the first voyage of Columbus necessarily leaves a great part of American history untold Every nation s story begins in the middle back of Leonidas are the Homeric heroes Romulus and Remus antedate the Tarquins So centuries before the clear glory of Columbus we have tradition of various shadowy explorers whose strange barques visited our shores Unless we grant the earliest inhabitants of America an autochthonic origin it seems most reasonable to suppose that they came from Asia Such authorities as Humboldt Bancroft and Prescott declare it their opinion that the monuments the systems of cosmogony the methods of computing time etc all point to an ancient communication with eastern Asia It is certain that from time immemorial constant intercourse has

been kept up between the natives of either side of Bering's Strait and it is very probable that the original immigrants came that way. There are other possible routes; the Aleutian Islands and Polynesia are the two next favored by the authorities. There is a distinct trace of Japanese blood in many of the native tribes of the northwest coast and we have too many modern instances of Japanese junks drifting upon the American coast after floating for months at the mercy of the Pacific currents to doubt the possibility of prehistoric visits of these people. What is known as the black stream or Japan current runs northward past the eastern coast of the Japanese Islands then curves to the east and south passing the west coast of America and moving toward the Sandwich Islands. This current it is said would carry a drifting vessel toward the American coast at the rate of ten miles a day. The theory which supposes the people or at least the civilization of America to be of Egyptian origin is based upon analogies existing between the architecture, hieroglyphics and various customs of the two countries. But even where these analogies bear the test of close examination they can scarcely be said to prove anything. In western Asia the Phoenicians, those bold voyagers and their children the Carthaginians, are given the honor of settling America. The records of their travels show that they knew of a country lying far to the west. In the writings of Diodorus Siculus is an elaborate account of a wonderful island in the Atlantic Ocean far beyond the Pillars of Hercules and many days journey from the coast of Africa. This happy land, fertile of soil, beautiful of scenery and perfect of climate, was accidentally discovered by Phoenician sailors whose barque was driven thither by contrary winds. On their return they gave such glowing accounts of the new country that large colonies of Tyrians left their native land to settle there. This may have been America but is more likely to have been the Canary Islands.
