American Government And Politics Today 2015 2016 Only:

Manifesto for New Social Movements César Augusto Rossatto, 2019-10-01 The world is currently witnessing the emergence of a new context for education labor and transformative social movements Global flows of people capital and energy increasingly define the world we live in The multinational corporation with its pursuit of ever cheaper sources of labor and materials and its disregard for human life is the dominant form of economic organization where capital can cross borders but people can't Affirmative action democracy and human rights are moving in from the margins to challenge capitalist priorities of efficiency i.e. exploitation In some places the representatives of popular movements are actually taking the reins of state power Across the globe new progressive movements are emerging to bridge national identities and boundaries in solidarity with transnational class gender and ethnic struggles At this juncture educators have a key role to play The ideology of market competition has become more entrenched in schools even as opportunities for skilled employment diminish We must rethink the relationship between schooling and labor developing transnational pedagogies that draw upon the myriad social struggles shaping students' lives and communities Critical educators need to connect with other social movements to put a radically democratic agenda based on the principles of equity access and emancipation at the center of educational praxis Many countries in Latin America like in other continents are developing new alternatives for the reconstruction of social projects these emerging sources of hope are the central focus of this book Major historical change always starts with people's social movement Democracy can be one of the best political and social systems in the world but for it to work entails the sustainable participation of citizens Above all it requires that people be informed and critically educated since the quality of democracy depends on quality of education There are 2 kinds of power money and people If people exercise their agency they can be more powerful than money There are some organizing principles of social movements as don't do for others what they should do for themselves Saul Alinsky wrote Rules for Radicals A pragmatic primer for realistic radicals Mary Rogers Cold Anger A story of faith and power politics Michael Gecan Going Public An organizer's guide to citizen action and Ernesto Cortez's Industrial Area Foundation are all great sources for organized activism that do work I put some of these principles to the test and they produced positive results I was a founder and president of a union at my university and I lived my whole life as an activist and learned that we can do more together than alone Now we also have a new digital war with the Cambridge Analytica and Breitbart's fake news manipulation however we also have social justice hacktivism to counteract it as well as other democratic social media venues that critical thinkers and activists use The chapters in this book demonstrate the importance of widening and diversifying social movements at the same time emphasizes the need to build cohesive alliances among all the different fronts What some people think is impossible can become a transformed reality for those who dare attempt changing the world as global citizens

Islam and Security in the West Stefano Bonino, Roberta Ricucci, 2021-04-26 What changes have the terrorist attacks on the United States in 2001 and the subsequent attacks in Europe brought to Western societies? In what ways have these events and their aftermath impacted on the relationships between Muslim communities and Western societies? This book explores the remaking of the relationship between Islam and Islamism on the one hand and security and securitization on the other hand by arguing that 9/11 and its aftermath have led to the opening of a new phase in Western and European history and have remade the relationship.

between Islam and governmental and societal approaches to security The authors utilize case studies across the Western world to understand this relationship Cyberwars in the Middle East Ahmed Al-Rawi,2021-07-16 Cyberwars in the Middle East argues that hacking is a form of online political disruption whose influence flows vertically in two directions top bottom or bottom up or horizontally These hacking activities are performed along three political dimensions international regional and local Author Ahmed Al Rawi argues that political hacking is an aggressive and militant form of public communication employed by tech savvy individuals regardless of their affiliations in order to influence politics and policies Kenneth Waltz s structural realism theory is linked to this argument as it provides a relevant framework to explain why nation states employ cyber tools against each other On the one hand nation states as well as their affiliated hacking groups like cyber warriors employ hacking as offensive and defensive tools in connection to the cyber activity or inactivity of other nation states such as the role of Russian Trolls disseminating disinformation on social media during the US 2016 presidential election This is regarded as a horizontal flow of political disruption Sometimes nation states like the UAE Saudi Arabia and Bahrain use hacking and surveillance tactics as a vertical flow top bottom form of online political disruption by targeting their own citizens due to their oppositional or activists political views On the other hand regular hackers who are often politically independent practice a form of bottom top political disruption to address issues related to the internal politics of their respective nation states such as the case of a number of Iraqi Saudi and Algerian hackers In some cases other hackers target ordinary citizens to express opposition to their political or ideological views which is regarded as a horizontal form of online political disruption This book is the first of its kind to shine a light on many ways that governments and hackers are perpetrating cyber attacks in the Middle East and beyond and to show the ripple effect of these attacks **American Government in Black and White** Paula Denice McClain,Steven C.
