The Anatomists' Library Colin Salter, 2023-07-20 The Anatomist's Library is a fascinating chronological collection of the best anatomical books from six centuries charting the evolution of both medical knowledge

and illustrated publishing There is a rich history of medical publishing across Europe with outstanding publications from Germany France Italy Netherlands Spain UK and also many from Persia and Japan Because of the high value of accurate medical textbooks it was these works that pushed the boundaries of illustrated publishing They commanded the expert illustrators and skilled engravers and hence didn't come cheaply They were treasured by libraries and their intrinsic worth has meant that there is an incredible wealth of beautifully preserved historic examples from the 15th century onwards The enduring popularity of Gray's Anatomy has shown that there is a long term interest in the subject beyond the necessity of medical students to learn the modern equivalent the 42nd edition 2020 from cover to cover But Englishman Henry Gray was late in the field and never saw the enduring success of his famous work Having first published the surgeon's reference book in 1858 he died in 1861 after contracting smallpox from his nephew who survived He was just 34 Gray was following on from a long tradition of anatomists starting with Aristotle and Galen whose competing theories about the human body dominated early medicine However they did not have the illustrative skills of Leonardo da Vinci who was trained in anatomy by Andrea del Verrocchio In 1489 Leonardo began a series of anatomical drawings depicting the human form His surviving 750 drawings from two decades represent groundbreaking studies in anatomy However none of Leonardo's Notebooks were published during his lifetime they only appeared in print centuries after his death Brussels born Andries van Wesel Andreas Vesalius professor at the University of Padua is deemed to be the founder of modern anatomical reference with his 1543 work *De Humani Corporis Fabrica Libri Septem* On the fabric of the human body in seven books An Italian contemporary was Bartolomeo Eustachi who supported Galen's medical theories Among other discoveries he correctly identified the Eustachian tube and the arrangement of bones in the inner ear His Anatomical Engravings were completed in 1552 nine years after Vesalius's great work but remained unpublished until 1714 These are just two entries in a book brimming with an abundance of important illustrated works with some more primitive examples from the 15th century up to the 42nd edition of Gray's in the 21st

Casualty Care for Fire and Rescue Kris Lethbridge, Simon Todd, Richard Pilbery, 2018-08-01 Casualty care and first aid is an integral part of the fire and rescue services role and firefighters have always worked closely with pre-hospital medical providers in their aim to save lives As the fire services are now increasingly involved in the delivery of medical care through co-responding schemes casualty care and first aid training has become crucial for firefighters to provide initial assessment and care of patients when responding to a variety of medical emergencies This textbook written by an experienced team of firefighters and paramedics is an essential guide to life saving care and has been specifically written for firefighters already employed or undertaking training within a fire and rescue service Casualty Care for Fire and Rescue combines a skills based practical approach with clinical knowledge and covers a range of urgent care that firefighters deliver and respond to including trauma injuries burns road traffic collisions and cardiac arrest The book is up to date with the latest policy and research and addresses legal issues and clinical governance A multi-disciplinary approach is taken throughout and

is explored in detail in a chapter on working with healthcare professionals Chapters are also illustrated with photographs and anatomical diagrams to support understanding Contents include Working with Other Health Professionals Communication Clinical Governance Legal and Ethical Issues Safeguarding Adults and Children Health and Safety Manual Handling Drug Administration Scene Assessment Patient Assessment Airway Breathing Circulation Disability Exposure Environment Medical Emergencies Trauma Emergencies Cardiac Arrest Children and Infants Mental Health Older People and Frailty
