A Level Geography Paper 1 June 2015zimsec:

COVID-19 Lockdowns and the Urban Poor in Harare, Zimbabwe Johannes Itai Bhanye, Fortune Mangara, Abraham R. Matamanda, Lameck Kachena, 2023-12-09 This book focuses on the socio economic impacts of the COVID 19 pandemic and associated lockdowns on the welfare of the urban poor in the city of Harare Zimbabwe. The authors look through the lenses of the urban health penalty, the right to the city, complexity theory and distributive justice theory. These four theories help situate the COVID 19 pandemic and its impacts on the urban poor in the theoretical foundations that raise issues of how the poor are affected by disease health pandemics due to their living conditions. Uniquely, the authors use remote ethnography tools such as rich texts, video diaries and photo uploads to provide evidence-based stories of how COVID 19 mobility restrictions have affected poor urbanites in Harare. The book concludes that the COVID 19 pandemic mandatory lockdowns have deepened social and spatial inequality among the urban poor, threatening their right to the city. The socio economic impacts can upsurge poverty, increase unemployment and the risks of hunger and food insecurity, reinforcing existing inequalities and breaking social harmony in the cities even past the COVID 19 pandemic period. These socioeconomic impacts must be considered to make just cities for all from a right to the city perspective. The authors recommend that mandatory COVID 19 lockdowns should not only be treated as a law and order operation but as a medical intervention to stem the spread of the virus, backed by measures to safeguard the livelihoods of the urban poor while also protecting the economy. This means governments should provide social safety nets to informal sector operators whose income-generating activities are affected the most during the time of emergencies like COVID 19. Planners and policymakers should re-envision pandemic resilient cities that are just, equitable, resilient and sustainable.

Rural Transformations Holly Barcus, Roy Jones, Serge Schmitz, 2022-03-30 This book focuses on the transformation of rural places, peoples and land endemic to the contemporary manifestations of globalization. Migration, global economic restructuring and climate change are rapidly transforming rural places across the globe. Yet global attention characteristically focuses on urban social and economic issues, neglecting the continued roles of rural people and places. Organized around the three core themes of demographic change, rural-urban partnerships and innovations, and landscape change, the case studies included in this volume represent both the Global North and Global South and underscore the complexity and multi-scalar nature of these contemporary challenges in rural development, planning and sustainability. This book would be valuable supplementary reading for both students and professionals in the fields of rural land management and rural planning.

Africa in World Politics John W. Harbeson, Donald Rothchild, 2016-12-13 The sixth edition of *Africa in World Politics* focuses on challenges African states face in constructing viable political economies in contexts both of familiar domestic challenges and an unprecedented mix of engagements, opportunities and threats emanating from a turbulent and rapidly changing international order. This text, including new chapters on Nigeria and the influence of party politics on economic development, remains an invaluable

resource for students of African politics seeking to navigate the continent's complex political and economic landscapes. Revised chapters consider both the extent and the limits of continued healthy growth rates in many countries, the impacts of investments by China and other BRICS countries, plateaus and some reversals in progress on human rights and democratization, dimensions of chronic state weakness deepened by insurgencies including some that are connected to Al Qaeda and the Islamic State, and peacebuilding efforts struggling to uphold responsible sovereignty in the Sudans, the Great Lakes region and elsewhere.

Inequality and Political Cleavage in Africa Catherine Boone, 2024-04-25. Extensive data maps and case histories show how competition between rich and poor regions drives African politics, not ethnic diversity.

Financing For Development - Revisiting the Monterrey Consensus International Monetary Fund, 2015-06-15. 2015 is set to be a pivotal year for the international development agenda with agreements to be reached on the objectives and policies for promoting development that is economically, socially, and environmentally sustainable through 2030. The first stage in completing the debate on these issues is the Third UN Conference on Financing for Development (FfD) to be held in Addis Ababa during July 13-16, 2015, which aims to build an international consensus on the actions needed to ensure that sufficient financing is available for developing countries in pursuing sustainable development.

Borderless Africa Francis Mangeni, Andrew Mold, 2024-04-18. The African Continental Free Trade Area established in 2018 represented a monumental step forward for Africa in terms of meeting longstanding aspirations for greater economic and political integration. But it has nonetheless been met with scepticism in some quarters both within the continent and beyond. Borderless Africa makes the case for the AfCFTA in an accessible and compelling way without shying away from technical and academic debates. Francis Mangeni and Andrew Mold take us on a journey through the different dimensions and implications of the AfCFTA, the largest free trade zone in the world, starting with its underlying economic rationale. Pointing to the numerous historical examples of successful regional integration, they argue that the African continent will need to take on board such lessons as the agreement is implemented. They discuss too the more controversial elements of the AfCFTA, including the freedom of movement protocol, contending that this should not be seen as an optional extra but as an intrinsic part of the accord. Also exploring the role of external partners in the construction of an economically stronger, more united Africa, this fascinating study reveals how the AfCFTA is contributing to sustainable development across the continent.

Resilience and Sustainability in Urban Africa Innocent Chirisa, Andrew Chigudu, 2021-08-02. Resilience has become a very topical issue transcending many spheres and sectors of sustainable urban development. This book presents a resilience framework for sustainable cities and towns in Africa. The rise in informal settlements is due to the urban planning practices in most African cities that rarely reflect the realities of urban life and environment for urban development. Aspects of places, people, and process are central to the concept of urban resilience and sustainable urban growth. It stems from the observation that urban vulnerability is on the increase in Zimbabwe and beyond. In history, disasters have adversely affected nations across the world.

inflicting wide ranging losses on one hand while on the other hand creating development opportunities for urban communities Cooperation in disaster management is a strategy for minimising losses and uplifting the affected urban settlements The significance of urban planning and design in the growth and development of sustainable urban centres is well documented Urbanisation has brought with it challenges that most developing countries such as Zimbabwe are not equipped to handle This has been accompanied by problems such as overpopulation overcrowding shortages of resources and the growth of slum settlements There need is to seriously consider urban planning and design in order to come up with contemporary designs that are resilient to current urban challenges There are major gaps in urban resilience building for instance in Harare and the local authority needs to prioritise investment in resilient urban infrastructure Going Nowhere Fast Sabina Lawreniuk, Laurie Parsons, 2020 Using data and insights from over ten years of field research in Cambodia this book explores how inequality persists in a hypermobile world **Urban Recycling Cooperatives** Jutta Gutberlet, 2016-05-12 Solid waste is a major urban challenge worldwide and decisions over which technologies or methods to apply can have beneficial or detrimental long term consequences Inappropriate management of solid waste can lead to damaging environmental impacts particularly in the megacities of the Global South *Urban Recycling Cooperatives* explores the multiple narratives and interdisciplinary nature of waste studies drawing attention to the pressing social economic and environmental challenges related to waste management The book asks questions such as how do we define waste and our relation to it who is involved in dealing with waste and what power interactions become manifest over issues of accessing and managing waste In recent years informal cooperatives have emerged devoted to recycling household and business waste before reclassifying it and redirecting it to the authorities Hence these workers are able to reclaim significant amounts of natural resources and thus contribute to the saving of resources and lessened waste management expenditures With particular reference to the Brazilian megalopolis of S o Paulo this book describes this paradigm shift in the general understanding of waste as unwanted discard towards the recognition of waste as a resource that must be recovered for reuse or recycling It would be of interest to students and policy makers working in international development and waste management The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *Indigenous knowledge systems and climate change management in Africa* Ajayi, O.C. (ed), Mafongoya, P.L. (ed), 2017-11-15 Climate change presents a profound challenge to food security and sustainable development in Africa Its negative impacts are likely to be greatest in the African region which is already food insecure In the face of global climate change and its emerging challenges and unknowns it is essential that decision makers base policies on the best available knowledge In recent years the knowledge of local and indigenous people often referred to as indigenous knowledge IK has been increasingly recognised as an important source of climate knowledge and adaptation strategies
