Mismeasurement and efficiency

estimates: Evidence from smallholder survey data in Africa Abay, Kibrom A., Wossen, Tesfamicheal, Chamberlin, Jordan, 2022-02-09 Smallholder agriculture in sub Saharan Africa is commonly characterized by high levels of technical inefficiency. However, much of this characterization relies on self-reported input and production data which are prone to systematic measurement error. We theoretically show that non-classical measurement error introduces multiple identification challenges and sources of bias in estimating smallholders' technical inefficiency. We then empirically examine the implications of measurement error for the estimation of technical inefficiency using smallholder farm survey data from Ethiopia, Malawi, Nigeria, and Tanzania. We find that measurement error in agricultural input and production data leads to a substantial upward bias in technical inefficiency estimates by up to 85 percent for some farmers. Our results suggest that existing estimates of technical efficiency in sub-Saharan Africa may be severe underestimates of smallholders' actual efficiency and what is commonly attributed to farmer inefficiency may be an artifact of mismeasurement in agricultural data. Our results raise questions about the received wisdom on African smallholders' production efficiency and prior estimates of the productivity of agricultural inputs. Improving the measurement of agricultural data can improve our understanding of smallholders' production efficiencies and improve the targeting of productivity-enhancing technologies. **A Modern Guide to Tourism Economics** Croes, Robertico, Yang, Yang, 2022-09-06 This Modern Guide captures the evolution of foundational tenets, theories, frameworks, and models that buttressed tourism economics into an evolving discipline, shining light on both new and old approaches. It systematically examines current and future trends and issues related to new economic perspectives, consolidating the notion of tourism economics as a discipline. *Advances in Economic Measurement* Duangkamon Chotikapanich, Alicia N. Rambaldi, Nicholas Rohde, 2022-10-03 The purpose of this book is to honour D. S. Prasada Rao and his many outstanding contributions to economic measurement, including index number methods for international comparisons of prices, real incomes, output, and productivity; stochastic approaches to index numbers; purchasing power parities for the measurement of regional and global inequality and poverty; and measurement of income and economic insecurity. This book brings together contributions by well-known and influential researchers in the field of economic measurement, with special focus on topics in productivity measurement. Part I: income and health inequality; inequality of opportunity and measurement of insecurity. Part II: index number theory and applications to consumer price index numbers; international comparisons of prices and real expenditures and housing price index numbers. Part III: The chapters are authored by eminent researchers including Conchita D'Ambrosio, Bert Balk, Erwin Diewert, Robert Hill, Robert Inklaar, Knox Lovell, Robin Sickles, Jacques Silber, and Marcel Timmer. The contributed papers offer in-depth reviews of the state of the art in these areas, with a focus on the existing methods and applications, making the volume an invaluable source for both experienced researchers and new researchers, including PhD and other postgraduate students.
