A Grammar Of Lezgian:

A Grammar of Lezgian Martin Haspelmath, 2011-09-27 The series builds an extensive collection of high quality descriptions of languages around the world Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and if appropriate a word list and other relevant information which is available on the language in question There are no restrictions as to language family or area and although special attention is paid to hitherto undescribed languages new and valuable treatments of better known languages are also included No theoretical model is imposed on the authors the only criterion is a high standard of scientific quality *A grammar of Sanzhi Dargwa* Diana Forker, 2020 Sanzhi Dargwa belongs to the Dargwa Dargi languages ISO dar Glottocode sanz1248 which form a subgroup of the East Caucasian Nakh Dagestanian language family Sanzhi Dargwa is spoken by approximately 250 speakers and is severely endangered This book is the first comprehensive descriptive grammar of Sanzhi written from a typological perspective It treats all major levels of grammar phonology morphology syntax and also information structure Sanzhi Dargwa is structurally similar to other East Caucasian languages in particular Dargwa languages It has a relatively large consonant inventory including pharyngeal and ejective consonants Sanzhi morphology is concatenative and mainly suffixing The language exhibits a mixture of dependent marking in the form of a rich case inventory and head marking in the form of verbal agreement Nouns are divided into three genders Verbal inflection conflates tense aspect mood evidentiality in a rich array of synthetic and analytic verb forms as well as participles converbs a masdar verbal noun and infinitive and some other forms used in analytic tenses and subordinate clauses Salient traits of the grammar are two independently operating agreement systems gender number agreement and person agreement Within the nominal domain modifiers agree with the head nominal in gender number Agreement within the clausal domain is mainly controlled by the argument in the absolutive case Person agreement operates only at the clausal level and according to the person hierarchy 1 2 3 Sanzhi has ergative alignment in the form of gender number agreement and ergative case marking The most frequent word order at the clause level is SOV though all other logically possible word orders are also attested In subordinate clauses word order is almost exclusively head final Understanding Syntax, Third Edition Maggie Tallerman, 2013-09-05 This is an introduction to the main categories constructions terminology and problems associated with syntax providing a basis from which students can proceed to more advanced work **The Syntax-Morphology Interface** Matthew Baerman, Dunstan Brown, Greville G. Corbett, 2005-09-15 Syncretism where a single form serves two or more morphosyntactic functions is a persistent problem at the syntax morphology interface It results from a mismatch whereby the syntax of a language makes a particular distinction but the morphology does not This pioneering book provides a full length study of inflectional syncretism presenting a typology of its occurrence across a wide range of languages The implications of syncretism for the syntax morphology interface have long been recognised it argues either for an enriched model of feature structure thereby preserving a direct

link between function and form or for the independence of morphological structure from syntactic structure This book presents a compelling argument for the autonomy of morphology and the resulting analysis is illustrated in a series of formal case studies within Network Morphology It will be welcomed by all linguists interested in the relation between words and the larger units of which they are a part

The Art of Grammar Aleksandr Aikhenval'd, 2015 This book introduces the principles and practice of writing a comprehensive reference grammar Several thousand distinct languages are currently spoken across the globe each with its own grammatical system and its own selection of diverse grammatical structures Comprehensive reference grammars offer a basis for understanding linguistic diversity and can provide a unique perspective into the structure and social and cognitive underpinnings of different languages Alexandra Aikhenvald describes the means of collecting analysing and organizing data for use in this type of grammar and discusses the typological parameters that can be used to explore relationships with other languages She considers how a grammar can be made to reflect and bring to life the society of its speakers through background explanation and the judicious choice of examples as well as by showing how its language history and culture are intertwined She ends with a full glossary of terms and guidance for those wanting to explore a particular linguistic phenomenon or language family The Art of Grammar is the ideal resource for students and teachers of linguistics language studies and inductively oriented linguistic cultural and social anthropology

The Semantics of Verbal Categories in Nakh-Daghestanian Languages, 2018-03-20 The Caucasus is the place with the greatest linguistic variation in Europe The present volume explores this variation within the tense aspect mood and evidentiality systems in the languages of the North East Caucasian or Nakh Daghestanian family The papers of the volume cover the most challenging and typologically interesting features such as aspect and the complicated interaction of aspectual oppositions expressed by stem allomorphy and inflectional paradigms grammaticalized evidentiality and mirativity and the semantics of rare verbal categories such as the deliberative May I go the noncurative Let him go I don't care different types of habituais gnomic qualitative non generic and perfective tenses aorist perfect resultative The book offers an overview of these features in order to gain a broader picture of the verbal semantics covering the whole North East Caucasian family At the same time it provides in depth studies of the most fascinating phenomena

Current Trends in Caucasian, East European, and Inner Asian Linguistics Howard Isaac Aronson, Dee Ann Holisky, Kevin Tuite, 2003 This volume is a collection of seventeen papers on languages of all three indigenous Caucasian families as well as other languages spoken in the territory of the former Soviet Union Several papers are concerned with diachronic questions either within individual families or at deeper time depths Some authors utilize their field data to address problems of general linguistic interest such as reflexivization A number of papers look at the evidence for contact induced change in multilingual areas Some of the most exciting contributions to the collection represent significant advances in the reconstruction of the prehistory of such understudied language families as Northeast Caucasian Tungusic and the baffling isolate Ket This book will be of interest not only to specialists in the

indigenous languages of the former USSR but also to historical and synchronic linguists seeking to familiarize themselves with the fascinating typologically diverse languages from the interior of the Eurasian continent Dee Ann Holisky is Professor of English and Linguistics and Associate Dean for Academic Programs of the College of Arts Montreal Editions Fides 2003

The Oxford Handbook of Ergativity Jessica Coon, Diane Massam, Lisa deMena Travis, 2017 This volume examines the phenomenon of ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects It includes theoretical approaches from generative typological and functional paradigms as well as 16 language specific case studies *Handbook of Descriptive Linguistic Fieldwork* Shobhana L. Chelliah, Willem J. de Reuse, 2010-10-06 The Handbook of Descriptive Linguistic Fieldwork is the most comprehensive reference on linguistic fieldwork on the market bringing together all the reader needs to carry out successful linguistic fieldwork Based on the experiences of two veteran linguistic fieldworkers and advice from more than a twenty active fieldwork researchers this handbook provides an encyclopedic review of current publications on linguistic fieldwork and surveys past and present approaches and solutions to problems in the field and the historical political and social variables correlating with fieldwork in different areas of the world The discussion of the ethical dimensions of fieldwork as well as what constitutes the typical linguistic fieldwork setting or consultant is explored from multiple perspectives relevant to fieldwork on every continent Included is information omitted in most other texts on the subject such as the collection representation management and methods of extracting grammatical information from discourse and conversational data as well as the relationship between questionnaire based elicitation text based elicitation and philology and the need for combinations of these methods The book is useful before during and after linguistic field trips since it provides extensive practical macro and micro organization and planning fieldwork tips as well as a handy sketch of major typological features for use in linguistic analysis Comprehensive references are provided at the end of each chapter as resources relevant to the reader s particular interests **Handbook of Comparative and Historical Indo-European Linguistics** Jared Klein, Brian Joseph, Matthias Fritz, 2017-09-25 This book presents the most comprehensive coverage of the field of Indo European Linguistics in a century focusing on the entire Indo European family and treating each major branch and most minor languages The collaborative work of 120 scholars from 22 countries Handbook of Comparative and Historical Indo European Linguistics combines the exhaustive coverage of an encyclopedia with the in depth treatment of individual monographic studies
