Mass Spectrometry R. A. W. Johnstone, 1975-12-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born

The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume

Reviews in Computational Chemistry, Volume 4 Kenny B. Lipkowitz, Donald B. Boyd, 2009-09-22 This volume in the series brings together renowned experts in the field to present the reader with an account of the latest developments in quantum mechanics molecular dynamics and the teaching of computational chemistry There are so many developments in the field of computational chemistry that it is difficult to keep track of them The series was established to review the high volume of developments in the field Rather than create a traditional article each author approaches a topic to enable the reader to understand and solve problems and locate key references quickly Each article has tutorial value An updated compendium of software for molecular modeling appears as an appendix as in previous volumes To the editors knowledge this is the most complete listing of sources of software for computational chemistry anywhere
