Democratic Norms of Earth System Governance Walter F. Baber,Robert V. Bartlett,2021-04-29 An analysis of the normative prerequisites for addressing the challenges of democratic earth system governance in the Anthropocene

Principles of Subjective Anthropology Binggong Chen,2023-03-27 This book puts forward the concept of subjective anthropology and outlines a theoretical system that will allow subjective anthropology to qualify as a new academic discipline in its own right In an effort to respond to the field s proper role as the science of humanity subjective analysis has been introduced into the study of anthropology The book fills two distinct gaps in our knowledge and understanding of modern man offering detailed descriptions of personality and of groups while also advancing the theory of structure and choice The book formulates seven basic principles of subjective anthropology and divides anthropology into three major branches subjective anthropology cultural anthropology and biological or physical anthropology which can be further divided into sub branches The book pursues three key goals advancing and developing the theoretical system of subjective anthropology reconstructing the discipline of anthropology and establishing a Chinese anthropology with Chinese characteristics Chinese visions and Chinese styles **Families and Religion** Christel Gärtner,Linda Hennig,Olaf Müller,2025-03-20 This comparative study examines the transmission of religion in families in Germany Italy Hungary Finland and Canada The

authors rely on the widely shared argument that religious change can primarily be understood as an intergenerational process. Based on a mixed methods design, the book investigates the question of how, when, exactly, and under what conditions the following generations become less religious than the previous ones. From the perspective of familial and historical generations, the authors examine the significance of religious socialization for the transmission of non-religious worldviews, affiliation, practice, and identity. According to a central finding, religious change takes place primarily in the phase of adolescence against the background of the respective social context. Impressionable Biologies Maurizio Meloni, 2019-01-10. During the twentieth century, genes were considered the controlling force of life processes and the transfer of DNA the definitive explanation for biological heredity. Such views shaped the politics of human heredity in the eugenic era; controlling heredity meant intervening in the distribution of good and bad genes. However, since the turn of the twenty-first century, this centrality of genes has been challenged by a number of postgenomic disciplines. The rise of epigenetics, in particular, signals a shift from notions of biological fixedness to ideas of plasticity and impressionability of biological material. This book investigates a long history of the beliefs about the plasticity of human biology, starting with ancient medicine and analysing the biopolitical techniques required to govern such permeability. It looks at the emergence of the modern body of biomedicine as a necessary displacement or possibly reconfiguration of earlier plastic views. Finally, it analyses the returning of plasticity to contemporary postgenomic views and argues that postgenomic plasticity is neither a modernistic plasticity of instrumental management of the body nor a postmodernist celebration of potentialities. It is, instead, a plasticity that disrupts clear boundaries between openness and determination, individual and community, with important implications for notions of risk, responsibility, and intervention. Routledge International Handbook of Rural Studies Mark Shucksmith, David L. Brown, 2016-05-20. Rural societies around the world are changing in fundamental ways, both at their own initiative and in response to external forces. The Routledge International Handbook of Rural Studies examines the organisation and transformation of rural society in more developed regions of the world, taking an interdisciplinary and problem-focused approach. Written by leading social scientists from many countries, it addresses emerging issues and challenges in innovative and provocative ways to inform future policy. This volume is organised around eight emerging social, economic, and environmental challenges: Demographic change, Economic transformations, Food systems and land, Environment and resources, Changing configurations of gender and rural society, Social and economic equality, Social dynamics and institutional capacity, Power and governance. Cross-cutting these challenges are the growing interdependence of rural and urban, the rise in inequality within and between places, the impact of fiscal crisis on rural societies, neoliberalism, power and agency, and rural areas as potential sites of resistance. The Routledge International Handbook of Rural Studies is required reading for anyone concerned with the future of rural areas. Handbook of Qualitative Research in Education Michael R.M. Ward, Sara Delamont, 2020-08-28. This updated second edition unpacks the discussions surrounding the finest qualitative

methods used in contemporary educational research Bringing together scholars from around the world this Handbook offers sophisticated insights into the theories and disciplinary approaches to qualitative study and the processes of data collection analysis and representation offering fresh ideas to inspire and re invigorate researchers in educational research

Education in a Federal UK John Furlong, Ingrid Lunt, 2019-10-23 Britain's two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK It seems that for the first time the public the media and the political elite have woken up to the fact that in different parts of the UK there are different histories different aspirations and different imagined futures in relation to a whole range of vitally important political issues But what the public debate often fails to recognise is that in many areas of public life perhaps especially education the UK is already a federal state and in key respects has been so for many years The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK This has been achieved by commissioning two different papers from each of the four countries Wales Scotland Northern Ireland and England The first is an overview exploring the distinctive history principles and current policies of each country The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country the Foundation Phase for Wales assessment policy in Scotland shared education initiatives in Northern Ireland and higher education policy in England Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today This volume was originally published as a special issue of Oxford Review of Education

Police Services Paresh Wankhade, David Weir, 2015-06-11 This volume provides fresh insights and management understanding of the changing role of policing against the backdrop of massive cuts in public expenditure experienced and the changing landscape of policing The challenges of funding training online crimes and cultural transformation are now felt globally The need to learn and adapt from suitable models of police service delivery have never been greater The book offers critical insights into the theory and practice of strategic and operational management of police services and the related professional and policy aspects One of the highlight of this volume is to bring together scholarship using experts academics practitioners and professionals in the field to each of the chosen topics The chapters are based in the practical experiences of the authors and are written in a way that is accessible and suitable for a range of audiences We are confident that this book will cater to a wider audience to inform policy and practice both in the UK and internationally Sir Peter Fahy QPM Chief Constable Greater Manchester Police Policing across the world is facing an increasing complexity of demand and public expectation creating new challenges for leadership and management The contributors to this work are among the leading thinkers in policing and present important new insights into both the past and the way forward It will be welcomed by all those convinced that radical new approaches are required across the public services Bill Skelly Deputy Chief Constable Devon and Cornwall Police UK At times it feels that the focus on leadership in the

police service is all about what went wrong the negative influences of a tightly knit culture and the almost inevitable rise of the technocrat It is refreshing to read a book that seeks new insights into the positive influences of police leadership and offers the prospect of a more emotionally aware and spiritually rich approach as to how those insights may be practically employed for the benefit of all in the police family and the communities we serve
