A Path To Self Accompanied Inner Communication:

A Path to Self Martine Garcin-Fradet, 2013-07-09 A path to Self This book is the synthesis of my work detailed in my previous books My objective is to explain the elaboration of an unknown yet very promising accompaniment technique I am talking about CPA in English Accompanied Inner Communication By accompanying the hand over a computer keyboard expression emerges from a part of ourselves that we do not usually have access to Thanks to this particular type of communication the hand becomes the heart's messenger By accompanying the hand over a computer keyboard the expression of a part of ourselves that we don't usually have access to emerges AIC is used with people who cannot speak as well as those who can The vision of handicap undergoes a quantum shift The typed texts show that no matter what the handicap is that limits communication or speaking an intact conscience unfolds at another level of reality than the cognitive or sensorial system The support of the hand opens the access to this intact part of the individual It is an approach that seems simple yet requires that the professionals using it be in a very special state of presence It is a state of consciousness that allies vigilance and total release which allows the sacred aspect of the text to emerge AIC does not claim to have a new theory about man or life It cannot be considered as a simple technique or as a treatment It is an attitude a welcome a companionship Accompanied Inner Communication helps each person accompanied to better structure himself and live his own life free of unconscious loyalties and useless attachments Listening is an essential aspect of Accompanied Inner Communication By listening and with the texts that emerge the person connects to his inner Self If this approach raises questions it also gives fabulous hope which contributes to each person's meaning of life

A Path to Self Martine Garcin-Fradet, 2013-11-28 The objective of this book is to explain the elaboration of an unknown yet very promising accompaniment technique The name of this approach is CPA in English Accompanied Inner Communication By accompanying the hand over a computer keyboard expression emerges from a part of ourselves that we do not usually have access to Accompanied Inner Communication associates words with touching by establishing contact and cupping the accompanied person's hand This communication is above all a welcome allowing each accompanied person to better structure himself and live his own life Listening in Accompanied Inner Communication is connecting the person to himself to his inner self The objective of this accompanying work is to facilitate the emergence of an aspect of the past as it was recorded by the person who is consulting so that he/she can live the present with increased consciousness It is not about rummaging around in the past but rather letting emerge what the person needs at that specific moment to live the present moment with consciousness and free of projections from the past AIC is used with people who cannot speak as well as those who can The vision of handicap undergoes a quantum shift The typed texts show that no matter what the handicap is that limits communication or speaking an intact conscience unfolds at another level of reality than the cognitive or sensorial system By accompanying the person with a handicap to write via AIC it is easier for them to find their place in this world and to give us messages destined

to help us grow In this way our jobs are reversed and the exchange between the person giving and the person receiving is respected while the dignity of each person is honored Accompaniment is an essential element in the technique the autor is using and teaching One of the goals of this accompaniment is to help the person consulting to stop judging himself to accept himself as he is and also to accept what life presents with as little resistance as possible AIC does not pretend to have a new theory about man or his life However it cannot be considered as a simple technique or treatment Accompanied Inner Communication allows each accompanied person to better structure himself and live his own life free from unconscious loyalties and useless attachments
