Biomimetics Through Nanoelectronics Jia Liu, 2017-11-16 This thesis presents original research on how to seamlessly integrate electronics with living biological systems Jia Liu has used silicon nanowires as active sensors to investigate biological signals at the cellular level He has also designed nanoelectronic networks into flexible three dimensional 3D and macroporous architectures which mimic the structure of tissue scaffolds for in vitro 3D integrations with synthetic tissues and in vivo implantation by means of syringe injection Importantly the results demonstrate 3D interpenetrations of nanoelectronic networks with neural networks 3D mapping of tissue activity and long term implantation with minimal immunoresponses Further the book discusses potential applications for pharmacological studies brain activity mapping and nanoelectronics enabled therapies The findings presented here have gained wide recognition including a top research ranking by Chemical Engineering News and being listed among Scientific American's 10 world changing ideas in 2015

Classical Dynamics of Particles and Systems Jerry B. Marion, 2013-10-22 Classical Dynamics of Particles and Systems presents a modern and reasonably complete account of the classical mechanics of particles systems of particles and rigid bodies for physics students at the advanced undergraduate level The book aims to present a modern treatment of classical mechanical systems in such a way that the transition to the quantum theory of physics can be made with the least possible difficulty to acquaint the student with new mathematical techniques and provide sufficient practice in solving problems and to impart to the student some degree of sophistication in handling both the formalism of the theory and the operational technique of problem solving Vector methods are developed in the first two chapters and are used throughout the book Other chapters cover the fundamentals of Newtonian mechanics the special theory of relativity gravitational attraction and potentials oscillatory motion Lagrangian and Hamiltonian dynamics
