author's previous research thereby providing smooth continuity and an engaging flow that follows the progression of the research. The VMT project has dual goals: a) to provide a source of experience and data for practical and theoretical explorations of group knowledge building and b) to develop an effective online environment and educational service for collaborative learning of mathematics. Studying Virtual Math Teams reflects these twin orientations: reviewing the intertwined aims and development of a rigorous science of small group cognition and a Web 2.0 educational math service. It documents the kinds of interactional methods that small groups use to explore math issues and provides a glimpse into the potential of online interaction to promote productive math discourse.
