The Multilingual Turn Stephen May,2013-07-24 Drawing on the latest developments in bilingual and multilingual research The Multilingual Turn offers a critique of and alternative to still dominant monolingual theories pedagogies and practices in SLA TESOL and bilingual education Critics of the monolingual bias argue that notions such as the idealized native speaker and related concepts of interlanguage language competence and fossilization have framed these fields inextricably in relation to monolingual speaker norms In contrast these critics advocate an approach that emphasizes the multiple competencies of bi multilingual learners as the basis for successful language teaching and learning This volume takes a big step forward in re situating the issue of multilingualism more centrally in applied linguistics and in so doing making more permeable its key sub disciplinary boundaries particularly those between SLA TESOL and bilingual education It addresses this issue head on bringing together key international scholars in SLA TESOL and bilingual education to explore from cutting edge interdisciplinary perspectives what a more critical multilingual perspective might mean for theory pedagogy and practice in each of these fields The Social Construction of Age Patricia Andrew,2012-01-11 This book explores the social construction of age in the context of EFL in Mexico It is the first book to address the age factor in SLA from a social perspective Based on research carried out at a public university in Mexico it investigates how adults of different ages experience learning a new language and how they enact their age identities as language learners By approaching the topic from a social constructionist perspective and in light of recent work in sociolinguistics and cultural studies it broadens the current second language acquisition focus on age as a fixed biological or chronological variable to encompass its social dimensions What emerges is a more complex and nuanced understanding of age as it intersects with language learning in a way that links it fundamentally to other social phenomena such as gender ethnicity and social class *Understanding by Design* Grant Wiggins,Jay McTighe,2005-03-15 ASCD Bestseller Wiggins and McTighe provide an expanded array of practical tools and strategies for designing curriculum instruction and assessments that lead students at all grade levels to genuine understanding How do you know when students understand Can you design learning experiences that make it much more likely that students understand content and apply it in meaningful ways Thousands of educators have used the Understanding by Design UbD framework to answer these questions and create more rigorous engaging curriculums Now this expanded 2nd edition gives you even more tools and strategies for results oriented teaching An improved template for creating curriculum units based on the breakthrough backward design method More specific guidelines on how to frame the big ideas you want students to understand Better ways to develop the essential questions that form the foundation of high
