proposes are based on preference rules which are criteria for evaluating a possible structural analysis of a piece of music. A preference rule system evaluates many possible interpretations and chooses the one that best satisfies the rules. After an introductory chapter Temperley presents preference rule systems for generating six basic kinds of musical structure: meter, phrase structure, contrapuntal structure, harmony, and key, as well as pitch spelling, the labeling of pitch events with spellings such as A flat or G sharp. He suggests that preference rule systems not only show how musical structures are inferred but also shed light on other aspects of music. He substantiates this claim with discussions of musical ambiguity, retrospective revision, expectation, and music outside the Western canon: rock and traditional African music. He proposes a framework for the description of musical styles based on preference rule systems and explores the relevance of preference rule systems to higher level aspects of music such as musical schemata, narrative and drama, and musical tension.

AS Film Studies Sarah Casey Benyahia, Freddie Gaffney, John White, 2006-09-27. Specifically designed to be user friendly, the second edition of AS Film Studies: The Essential Introduction has a new text design to make the book easy to follow, includes more than 100 colour photographs, and is jam packed with features such as Case studies relevant to the 2008 specification, Activities on films including *Little Miss Sunshine*, *Pirates of the Caribbean: The Descent*, Key terms, Example exam questions, Suggestions for further reading, and website resources.

Popular Music Theory and Analysis Thomas Robinson, 2017-04-21. Popular Music Theory and Analysis: A Research and Information Guide uncovers the wealth of scholarly works dealing with the theory and analysis of popular music. This annotated bibliography is an exhaustive catalog of music theoretical and musicological works that is searchable by subject, genre, and song title. It will support emerging scholarship and inquiry for future research on popular music.

The Musical Language of Rock David Temperley, 2018. In all of the books about rock music, relatively few focus on the purely musical dimensions of the style: dimensions of harmony and melody, tonality and scale, rhythm and meter, phrase structure and form, and emotional expression. *The Musical Language of Rock* puts forth a new comprehensive theoretical framework for the study of rock music by addressing each of these aspects. Eastman music theorist and cognition researcher David Temperley brings together a conventional music analytic approach with statistical corpus analysis to offer an innovative and insightful approach to the genre. With examples from across a broadly defined rock idiom encompassing everything from the Beatles to Deep Purple, Michael Jackson to Bonnie Raitt, *The Musical Language of Rock* shows how rock musicians exploit musical parameters to achieve aesthetic and expressive goals, for example, the manipulation of expectation and surprise, the communication of such oppositions as continuity/closure and tension/relaxation, and the expression of emotional states. A

major innovation of the book is a three dimensional model of musical expression representing valence energy and tension which proves to be a powerful tool for characterizing songs and also for tracing expressive shifts within them The book includes many musical examples with sound clips available on the book s website The Musical Language of Rock presents new insights on the powerful musical mechanisms which have made rock a hallmark of our contemporary musical landscape
