Ancient Aliens History Channel:

Exophilosophy Richard Playford, 2024-12-09 This volume addresses philosophical questions raised by the possibility of alien life and extraterrestrial intelligence The different philosophical perspectives and approaches presented across the chapters will provide a foundation for future work on exophilosophy Interest in space space exploration and alien life has never been greater In popular culture for example it has proven a persistent theme in science fiction films e g Star Trek Star Wars books e g H G Wells Arthur C Clarke Ray Bradbury and computer games e g Sid Meier s Alpha Centauri as well as bestselling non fiction books von D niken s multimillion selling Chariots of the Gods and hit documentary shows e g Ancient Aliens There has also been persistent interest in these topics amongst scientists with organizations such as NASA and SETI having an enormous impact on both the scientific and popular imagination Yet curiously the topic has received relatively little philosophical attention Whilst certain aspects of these topics remain within the proper purview of the sciences a host of philosophical questions are raised by the possibility of alien life and extraterrestrial intelligences and the possibility of our coming into contact with them This collection of essays will examine some of these questions whilst laying the groundwork for future study in an as yet under researched area of philosophy Exophilosophy is essential reading for scholars and students with an interest in space and philosophy especially those working in philosophy of science metaphysics epistemology ethics philosophy of language and philosophy of religion *Aliens, UFOs, and Unexplained Encounters* Dave Kelly, Andrew Coddington, 2017-07-15 Aliens UFOs paranormal abductions these are all events that have captivated and entertained people for millennia In recent times people have turned to science to explain the unexplainable but does that answer everything This book examines the history of well known unexplained encounters while exploring the science behind fascinating alien events Full of photographs eyewitness accounts hoaxes and scientific evidence this book allows readers to engage the age old question Are we alone in the universe **ALIENS, BLACK HOLES and Some Answers** Danny Five Toes, 2022-07-06 A moment on the timeline of one line item in an epic six billion year plan for survival by the intelligent races of Andromeda resulted in the current human race on Earth Criminal components in those societies crafted a plot to get rich off an unguarded planet It took four hundred thousand years for the authorities reaction to get here Striking high and low did not vanquish and punish all involved It however did terminate our gold mining slavery Therefore posted guards are necessary If you stumble upon one ought not go poking it with a stick Aliens Andrew Coddington, 2016-07-15 For as long as humans have been on Earth they have wondered if other intelligent life exists in the universe If so what would these extraterrestrial beings look like Today there are true alien believers as well as skeptics Some people have claimed aliens exist and have been responsible for creating great works of wonder such as the pyramids and crop circles Others are less sure Regardless human history has seen many stories of mysterious flashing lights flying objects and even alien abductions This book discusses the history of alien lore and seeks to answer the question Are humans alone or are aliens among us God and Astrobiology

Richard Playford, Stephen Bullivant, Janet Siefert, 2024-02-22 The perception that life on other planets would be problematic for religious people and indeed for religion itself is a longstanding one. It is partially rooted in fact: astrobiological speculations have on occasion engendered religious controversies. Historical discussions are often far more nuanced and less one-sided than often imagined. Exotheology is a lively subdiscipline within several religious traditions. This Element offers a wide-ranging introduction to the multifarious problems of God and astrobiology, real and perceived. It covers major topics within Christian theology, e.g. creation, incarnation, salvation, as well as issues specific to Judaism, Islam, Buddhism, and Hinduism. It also discusses the very different perspectives offered by other non-religious traditions, including Mormonism, various alien-positive new religious movements, e.g. Heaven's Gate, Scientology, Raism, and the Ancient Astronaut theories popularized by Erich von Däniken and the History Channel's *Ancient Aliens*. **The Long Ascent, Volume 3** Robert Sheldon, 2023-06-20 Can Eden, the flood, and the Tower of Babel be real events that historians have simply renamed? Could Finnish and Norse, Hindu, Greek, and Egyptian myth all be recording this same real history? Did Noah's generation surpass the agricultural, nuclear, and biotech technology of the twenty-first century? How did the ancients cut the multi-ton stones of the Egyptian pyramids and Incan walls or melt Scottish forts? Did ancient China and Sumer know about the twin helix of DNA? Were successful human breeding experiments the origin of giants while monsters like Grendel were the result of failures? What disaster occurred to them that caused the forgetting of all this knowledge? We know that comets captured by the sun's gravity break up into boulder streams that periodically intersect the Earth's orbit. Plato and the rabbis told us that repeating cosmic disasters have erased most of our history, leaving us only myth and Genesis. This book weaves the modern scientific evidence from Greenland ice cores, Mediterranean bathymetry, NASA archaeology, and human genetics with the linguistic insights of the Hebrew of Genesis 1-11 into a compelling narrative that we are only the second most advanced civilization on planet Earth. For now. *Alien Sightings in America* Jennifer Bringle, 2011-12-15 In 1878 in Denison, Texas, a man named John Martin looked up into the sky and saw something he could not explain. Americans have been hooked on the possibility of beings from space visiting Earth ever since. A sense of wonder and reality are brought to some popular legends of alien encounters and sightings in this volume. The final chapter explores how these legends have become even more popular thanks to movies, television, and literature. *The Certainty Illusion* Timothy Caulfield, 2025-01-07 In a world where there is so much conflicting information about how we are supposed to live, what can we really know? Knowing the truth, what's real from what's fake, should be easy. In today's world, that's far from the case. In *The Certainty Illusion*, Timothy Caulfield lifts the curtain on the forces contributing to our information chaos and unpacks why it's so difficult, sometimes even for experts, to escape the fake. Whether it's science, our own desire to be good and do the right thing, or the stories and opinions of others, there's more to sussing out the truth than simply tracking down what feels like an authoritative source. Caulfield argues that these major forces—science, goodness, and opinion—drive beliefs and behaviour, but the ways that they can be corrupted, or

worse used to nefarious ends by bad actors are endless While it may feel at times as though we are circling the drain of truth especially as new technologies make it even easier to spread dangerous fictions Caulfield pulls us out of the vortex and keeps us afloat helping us recognize and combat the forces that threaten to pull us under Excavating the Future Shawn Malley, 2018-04-27 A cultural study of an array of popular North American science fiction film and television texts Excavating the Future explores the popular archaeological imagination and the political uses to which it is being employed by the U S state and its adversaries **Extraterrestrial Ethics** Jensine Andresen, 2023-11-25 This unique book takes both inductive and deductive approaches to the topic of extraterrestrial ethics Inductively it asks what kind of ethics an advanced intelligent extraterrestrial species might display Deductively it asks how human beings should transform their own understanding of ethics to prepare for widespread contact with an advanced extraterrestrial species Using the ontological interpretation of quantum mechanics proposed by physicist and philosopher David Bohm Extraterrestrial Ethics considers how an extraterrestrial intelligence ETI may view ethical concerns relating to humankind The book examines two areas of concern nuclear technologies and the militarization and weaponization of space The text of the Fiscal Year 2022 National Defense Authorization Act FY22 NDAA in the United States clearly states that Unidentified Aerial Phenomena UAP have been reported at sites associated with nuclear weapons nuclear powered ships and submarines nuclear power generating stations etc suggesting that ETI is very concerned about the human use of nuclear technologies Furthermore the more ubiquitous level of UAP sightings by the U S military over the last few years as documented in the June 2021 report from the Office of the Director of National Intelligence ODNI in the U S suggest that ETI also is concerned about rapid acceleration relating to the militarization and weaponization of space The book concludes by advocating a normative approach to de militarize space
