

Instructor's Solutions Manual

Chapter 2 – Solutions to Assignment Problems

Solution to AP 2-1

While there are alternatives in all Cases, the following answers represent the "minimum" instalments, as required in the problem.

Part A - Case One

Ms. Nite's net tax owing in each of the three years is as follows:

2019 = \$4,400 (\$18,880 – \$14,480)
2020 = \$600 (\$20,320 – \$19,720)
2021 = \$3,120 (\$21,760 – \$18,640) Estimated

As her net tax owing is expected to exceed \$3,000 in 2021 and was more than \$3,000 in 2019, the payment of instalments is required.

If the CRA's instalment reminder approach was used, the first two instalments total \$2,200 $[(2)(\$4,400 \div 4)]$. As this \$2,200 exceeds the total for 2020, the remaining two instalments would be nil.

The best alternative would be to base the instalments on 2020 net tax owing. This would result in quarterly instalments of \$150 $(\$600 \div 4)$, for a total of \$600. This is significantly lower than the \$2,200 required in the first two instalments under the CRA approach.

Part A - Case Two

Ms. Nite's net tax owing in each of the three years is as follows:

2019 = Nil (\$18,880 – \$19,280)
2020 = \$5,440 (\$20,320 – \$14,880)
2021 = \$3,200 (\$21,760 – \$18,560) Estimated

As her net tax owing is expected to exceed \$3,000 in 2021 and was more than \$3,000 in 2020, the payment of instalments is required.

If the CRA's instalment reminder approach was used, the first two instalments would be nil. However, the remaining two instalments would be \$2,720 each $[(\$5,440 - \text{Nil}) \div 2]$, for a total of \$5,440.

The best alternative would be to base the instalments on 2021 net tax owing. This would result in quarterly instalments of \$800 $(\$3,200 \div 4)$, for a total of \$3,200. This is significantly less than the \$5,440 total required under the CRA approach.
