Student Study Guide for Campbell's Biology Second Edition Martha R. Taylor, 1990 *Instructor's Guide for Campbell's Biology* Nina Caris, Harold T. Underwood, 1996 Biology Neil A. Campbell, Jane B. Reece, 2005 Neil Campbell and Jane Reece's BIOLOGY remains unsurpassed as the most successful majors biology textbook in the world. This text has invited more than 4 million students into the study of this dynamic and essential discipline. The authors have restructured each chapter around a conceptual framework of five or six big ideas. An Overview draws students in and sets the stage for the rest of the chapter; each numbered Concept Head announces the beginning of a new concept, and Concept Check questions at the end of each chapter encourage students to assess their mastery of a given concept. New Inquiry Figures focus students on the experimental process, and new Research Method Figures illustrate important techniques in biology. Each chapter ends with a Scientific Inquiry Question that asks students to apply scientific investigation skills to the content of the chapter. **The Marathon of the Messenger** Jérôme Lemonnier, Nicolas Lemonnier, 2023-11-01. The Covid 19 pandemic changed the world. Indeed, a real race took place worldwide between SARS-CoV-2 on the one hand and researchers on the other, especially those specializing in messenger RNA vaccines. Four years after its emergence, the pandemic is not over, but some decisive battles have been won thanks to the great success of mRNA vaccines. The Marathon of The Messenger presents the history of these mRNA vaccines, combining a scientific background with historical and economic perspectives. It appears that an important page in the history of these new vaccines was written in Europe thanks to the crucial work of German and French scientists; this effort began in 1993 and continues to this day. In the face of a prevailing single-mindedness, these researchers pushed through a new therapeutic concept and defined the biotechnological keys that would open the way to the production of therapeutic messenger RNA in the fight against cancer and viral infections. Written for a broad audience and accompanied by humorous cartoons, this book will appeal to anyone looking for scientific and historical answers about mRNA vaccines. Readers will discover not only the technical and scientific knowledge of how these vaccines work but also the economic levers that were necessary to create this technology. This book has been written in collaboration with Dr Steve Pascolo, former director of CureVac and the RNA messenger expert Professor Chantal Pichon. It also features a preface by Dr Pierre Meulien, former director of the European Union public-private partnership Innovative Medicines Initiative (IMI).
