Looking Inside Cells (continued)

10. In the table below, describe the function of each organelle in the cytoplasm.

Organelles in Cytoplasm	
Organelle	Function
Mitochondria	Convert energy in food molecules to energy the cell can use to carry out its functions.
Endoplasmic reticulum	Carry proteins and other materials from one part of the cell to another.
Ribosomes	Produce proteins
Golgi bodies	Receive proteins + other materials from the E.R., package them and distribute them.
Chloroplasts	Capture energy from sunlight and use it to produce food for the cell.
Vacuoles	Store food, water and waste.
Lysosomes	Contain chemicals that break down food, old cell parts and the release substances so they can be used again.

Specialized Cells

11. The structure of each kind of body cell is suited to its function.

Bacterial Cells

12. Circle the letter of each sentence that is true about bacterial cells.

- a. Bacterial cells are larger than plant or animal cells.
- ☒ b. Bacterial cells have a cell wall and a cell membrane.
- ☒ c. Bacterial cells do not have a nucleus.
- d. Bacterial cells do not have genetic material.

cells form tissues that form organs that are part of organ systems that make up an organism.

LBL Research Review, 1988 Signalling Pathways in Acute Oxygen Sensing Derek J. Chadwick, Jamie A. Goode, 2006-03-30 Oxygen sensing is a key physiological function of many tissues but the identity of the sensor the signalling pathways linking the sensor to the effector and the endpoint effector mechanisms are all subjects of controversy This book evaluates the various mediators that have been proposed including the mitochondria NAD P H oxidases cytochrome p450 enzymes and direct effects on enzymes and ion channels There has been a resurgence of interest in the role of mitochondria based partly on the ability of mitochondrial inhibitors to mimic hypoxia but there is little consensus concerning mechanisms Some favour the view that the primary signalling event is a reduction in cell redox state and reactive oxygen species ROS due to general inhibition of the electron transport chain ETC others support a key role for complex III of the ETC and an increase in ROS generation while others doubt either of these components is the key intermediary All these hypotheses are discussed in the book together with conceptual problems concerning the ability of mitochondria to respond to physiological hypoxia The other area of controversy covered in the book is the identity of the endpoint effector s Some authors favour K channel inhibition followed by depolarization and Ca²⁺ entry via L type channels while others propose that release of Ca²⁺ from intracellular stores or capacitative Ca²⁺ entry and other voltage independent pathways may be more important The book also describes evidence for an endothelium dependent Ca²⁺ sensitizing pathway involving Rho and possibly other kinases While some of these differences can be attributed to variation between tissues many must be related to differences in interpretation or methodology In this book experts in the field of acute oxygen sensing working in different tissues address these controversies and their possible origins and discuss possible approaches whereby these controversies might be resolved The book will be of great interest to all those working in fields where oxygen sensing is important particularly cancer and wound healing as well as researchers in drug discovery and biotechnology **Advanced Excel for Productivity** Chris Urban, 2016-09 This book is for those who are familiar with Microsoft Excel and use it on a regular basis You know there s more out there a way to do more faster and better Learn to step up your game with Advanced Excel for Productivity a readable and useful guide to improving everything you do in Excel Learn advanced techniques for Microsoft Excel including
