Loving Science - but Not the Empire Jay Sonstroem, 2023-02-27 For decades the world has been telling us that God is dead and science has proven it but is that really true As the evidence has continued to accumulate the tide has turned God is back to full health and not only that but He is far more awesome and ingenious than we ever imagined Now it is the scientific establishment that is on the ropes as a century of errors and deception has been unearthed In Loving Science But Not the Empire experimental scientist Jay Sonstroem helps readers discern between the findings of real science and fables which have been pushed by an entity he calls The Empire Jay provides short readable chapters to reveal both the wonders of creation and the schemes and blunders of The Empire which have resulted from its hijacked version of science Topics include the hidden truth of DNA the wonders of biology the fine tuning of the universe and evolution and Darwinism debunked Is it possible to love science but not worship it You bet Does a person who believes in God have to give up Reason No Come along and piece together the puzzle of life the universe and everything in between What you believe about your origins has everything to do with what you believe about your destiny Follow the light find the Truth and together let s free science from a Godless agenda
