Teacher's ed Nancy Roser,1987 Handbook of the Sociology of Emotions Jan Stets,Jonathan H. Turner,2007-02-25 For almost thirty years sociologists have increasingly theorized about and conducted research on human emotions Surprisingly it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry What makes this late date surprising is that it is now obvious that human behavior interaction and organization are driven by emotions It was

an immense oversight for emotions to be de emphasized in sociological theorizing and research for most of its 175 year history Since the 1970s however the study of emotions has accelerated and is now at the forefront of sociological analysis This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs The first section of the book addresses the range of emotions and how they can be classified the neurological underpinnings of emotions and the effect of gender on emotions The second section reviews the prominent sociological theories of emotions including theories emphasizing power and status rituals identity and self psychoanalytic dynamics exchange expectation states and evolution While there is little integration among these theories this state of affairs will not last forever The third section addresses theory and research on specific emotions such as love jealousy and envy empathy sympathy anger grief and the moral emotions While this list does not exhaust the range of human feeling they are central emotions that drive human behavior interaction and social organization The last section explores how the study of emotions has added new insight into other subfields within sociology such as the study of the workplace health and social movements These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology Although no book can completely cover a field even a relatively new one like the sociology of emotions this Handbook of the Sociology of Emotions comes close to being comprehensive The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years

Contemporary Sociological Thought Sean P. Hier, 2005-11-01 This innovative new reader on contemporary sociological theory has a Canadian emphasis This volume unites 21 influential European and American social theorists with 13 Canadian thinkers and writers to offer a strong Canadian interpretation of international theoretical currents spanning almost 80 years Ideally designed for undergraduate courses as an introduction to modern sociological theory the first section masterfully introduces the major theoretical offerings of the 20th century structural functionalism symbolic interaction and feminist analysis It also profiles themes of class conflict and the state and modernism culture and change The second section is devoted to critical themes for the 21st century This includes postmodernity and its critics society subjects and the self globalization and global consciousness and postcolonialism diaspora citizenship and identity Unique features of the book are its provocative presentation of 21st century themes and the inclusion of many of today's most influential social thinkers such as Edward Said Stuart Hall Jurgen Habermas Ulrich Beck Jean Baudrillard and Pierre Bourdieu The Canadian content includes readings from key Canadian scholars and social critics such as Dorothy Smith Naomi Klein Mariana Valverde Leo Panitch John Porter Charles Taylor David Lyon and Will Kymlicka This book will be an essential text for modern sociological

theory courses offered in sociology departments across Canada *About Criminals* Mark Pogrebin, 2011-12-09 This book presents students with recent and important research on criminal behavior The articles in this anthology all based on actual field studies provide the reader with a realistic portrayal of what actual offenders say about crime and their participation in it The offenders voices along with the researchers analyses offer students a real life view of what how and why various

criminals behave the way they do **Qualitative Methods and Health Policy Research** Elizabeth Murphy, 2017-07-05 Qualitative researchers have traditionally been cautious about claiming that their work was scientific The right on schools have exaggerated this caution into an outright rejection of science as a model for their work Science is for them outmoded an archaic form of consciousness surviving for a while yet in a degraded form Tyler 1986 200 Scientists assertions that they are in pursuit of truth simply camouflage their own lust for power There is no essential difference between truth and propaganda The authors acknowledge that the boundary between science and propaganda has often been breached and some distrust of scientific claims may be healthy They also question the claim that science creates disinterested and objective knowledge of an observer independent world without concluding that science is impossible The skeptics reservations about qualitative research are based on the deep rooted assumption among natural scientists and some social scientists that there is a world out there prior to and independent of their observations This world can be known objectively in the sense that all observers will if identically placed see it in exactly the same way If a suitable language were available they would also all produce identical descriptions From these observations they can work out the laws governing the world s operations The authors try to resolve these contrary claims by asserting that science is a procedural commitment It consists of openness to refutation a conscientious and systematic search for contradictory evidence and a readiness to subject one s preconceptions to critical examination The devotion to truth as a regulative ideal is an essential difference between science and propaganda This work is a unique and innovative defense of scientific method The Substance of Sociology Ephraim Harold Mizruchi, 1967
