In this latest edition of her bestseller, renowned educator Kay Burke provides a wide range of updated, easy-to-implement alternative assessments that address today's accountability requirements and focus on improving learning. Designed for use across all content areas, these formative assessments are rooted in the language of state standards and emphasize differentiating instruction to meet students' individual learning needs. Revised throughout with updated research, this new edition helps K-12 teachers build response to intervention checklists for struggling students, develop unit plans using differentiated learning and assessment strategies, create portfolios that emphasize metacognition, design performance tasks that motivate and engage students, construct rubrics that describe indicators of quality work, create tests that focus on higher-order thinking skills, offering numerous applications and examples. **How to Assess Authentic Learning** guides teachers in developing the assessment tools needed to help all students meet or exceed mandated academic standards. *Teaching Mathematics in Grades 6 - 12* Randall E. Groth, 2012-08-10 A journey into the vibrant and intriguing world of mathematics education. *Teaching Mathematics in Grades 6-12* explores how research in mathematics education can inform teaching practice in grades 6-12. The author shows secondary mathematics teachers the value of being a researcher in the classroom by constantly experimenting with methods for developing students' mathematical thinking and then connecting this research to practices that enhance students' understanding of the material.

The chapters in Part I introduce secondary teachers to the field of mathematics education with cross cutting issues that apply to teaching and learning in all mathematics content areas The chapters in Part II are devoted to specific mathematics content strands and describe how students think about mathematical concepts The goal of the text is to have secondary math teachers gain a deeper understanding of the types of mathematical knowledge their students bring to grade 6 12 classrooms and how students thinking may develop in response to different teaching strategies
