Durbin,2004-08-06 This text is appropriate for any one semester junior senior level course in Modern Algebra Abstract Algebra Algebraic Structures or Groups Rings and Fields Durbin has two main goals to introduce the most important kinds of algebraic structures and to help students improve their ability to understand and work with abstract ideas The first six chapters present the core of the subject the remainder are designed to be as flexible as possible Durbin covers groups before rings which is a matter of personal preference for instructors The course is mostly comprised of mathematics majors but you will find engineering and computer science majors as well **Algebra** William G. McCallum,Eric Connally,Deborah Hughes-Hallett,2014-11-25 Algebra Form and Function was designed based on the fundamental goal for a student to foster understanding of algebraic structure that is an understanding of how the arrangements of symbols allows us to predict for example the behavior of a function or the number of solutions to an equation Mastering algebraic structure enables students to read algebraic expressions and equations in real life contexts not just manipulate them and to choose which form or which operation will best suit the context It facilitates being able to translate back and forth between symbolic graphical numerical and verbal representations By balancing practice in

manipulation and opportunities to see the big picture Algebra Form and Function offers a way for teachers to help students achieve real mastery of algebra *Instructor's Solutions Manual for Larson/Falvo's Elementary Linear Algebra, 7th*
