Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R. Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally

Logue, 2017-09-08 A personal account of the implementation of a controversial credit transfer program at the nation's third largest university Change is notoriously difficult in any large organization Institutions of higher education are no exception From 2010 to 2013 Alexandra Logue then chief academic officer of The City University of New York led a controversial reform initiative known as Pathways The program aimed to facilitate the transfer of credits among the university's nineteen constituent colleges in order to improve graduation rates a long recognized problem for public universities such as CUNY Hotly debated Pathways met with vociferous resistance from many faculty members drew the attention of local and national media and resulted in lengthy legal action In Pathways to Reform Logue the figure at the center of the maelstrom blends vivid personal narrative with an objective perspective to tell how this hard fought plan was successfully implemented at the third largest university in the United States Logue vividly illustrates why change does or does not take place in higher education and the professional and personal tolls exacted Looking through the lens of the Pathways program and factoring in key players she analyzes how governance structures and conflicting interests along with other institutional factors impede change which Logue shows is all too rare slow and costly In

this environment she argues it is shared governance combined with a strong central decision making authority that best facilitates necessary reform Logue presents a compelling investigation of not only transfer policy but also power dynamics and university leadership Shedding light on the inner workings of one of the most important public institutions in the nation Pathways to Reform provides the first full account of how despite opposition a complex higher education initiative was realized All net royalties received by the author from sales of this book will be donated to The City University of New York to support undergraduate student financial aid Helping Children Learn Mathematics, 5th Australian Edition Robert
