Apex Algebra 2 Semester 1 Quiz Answers

Answers to the Apex Algebra 2 Semester 1 Quiz are provided below. These answers are for informational purposes only.

1. The first step in solving a system of linear equations is to write each equation in slope-intercept form. This allows you to compare the slopes of the two lines. If the slopes are the same, the lines are either parallel or coincident. If the slopes are different, the lines intersect at one point. In this case, the slopes are $m_1 = 2$ and $m_2 = 3$, which are different. Therefore, the lines intersect at one point. To find the point of intersection, substitute $x = 1$ into either equation. Using the first equation, $y = 2(1) + 3 = 5$. The solution is $(1, 5)$.

2. The second step in solving a system of linear equations is to solve for one variable. In this case, we will solve for y .

Auditory Efferent System:

New Insights from Cortex to Cochlea Paul H. Delano, Ana B. Elgoyhen, 2016-09-06 The main function of the sensory systems is the transducing of external stimuli into bioelectrical signals which are conducted through afferent pathways from sensory epithelia to the brain. However, it is known that descending projections are ubiquitous in the different sensory modalities and in the case of auditory efferents connect the cerebral cortex with sensory receptor cells. Several functions have been attributed to the efferent system including protection to acoustic trauma, unmasking of auditory stimuli in background noise, balance of interaural sensitivity and some cognitive functions like modulation of cochlear sensitivity during selective attention to auditory or visual stimuli. In addition, there is evidence of a possible involvement of the efferent system in the etiology or treatment of some clinical pathologies like tinnitus. In this e-book entitled *Auditory Efferent System: New Insights from Cortex to Cochlea*, we aimed to give an overview of the advances concerning the descending projections from the auditory cortex to subcortical nuclei and the olivocochlear system. In addition, different theoretical proposals of efferent functions are presented. We think that this e-book is an important contribution to the understanding of the efferent system in mammals, merging auditory cortex literature with studies performed in the olivocochlear system. *Human Microanatomy* Stephen A.
