CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

MARK SCHEME for the May/June 2013 series

0625 PHYSICS

0625/31 Paper 3 (Extended Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Jones, 2014-06-12 Renewable Energy Integration is a ground breaking new resource the first to offer a distilled examination of the intricacies of integrating renewables into the power grid and electricity markets It offers informed perspectives from internationally renowned experts on the challenges to be met and solutions based on demonstrated best practices developed by operators around the world The book s focus on practical implementation of strategies provides real world context for theoretical underpinnings and the development of supporting policy frameworks The book considers a myriad of wind solar wave and tidal integration issues thus ensuring that grid operators with low or high penetration of renewable generation can leverage the victories achieved by their peers Renewable Energy Integration highlights carefully explains and illustrates the benefits of advanced technologies and systems for coping with variability uncertainty and flexibility Lays out the key issues around the integration of renewables into power grids and markets from the intricacies of operational and planning considerations to supporting regulatory and policy frameworks Provides global case studies that highlight the challenges of renewables integration and present field tested solutions Illustrates enabling and disruptive technologies to support the management of variability uncertainty and flexibility Did Ancient Chinese Explore America Charlotte Harris Rees, 2014-04-23 A Chinese classic the Shan Hai Jing reportedly from 2000 BC claimed travels to the ends of the earth However today many while accepting the antiquity of this account believe it was just mythology But was it Testing the hypothesis that the Shan Hai Jing described actual surveys of North America Charlotte Harris Rees author of books about early Chinese exploration followed an alleged 1100 mile Chinese trek along the eastern slope of the US Rocky Mountains The Chinese account should have been easy to disprove In the travelogue Did Ancient Chinese Explore America Rees candidly shares her initial doubts then her search and discoveries She weaves together history subtle humor academic studies and many photographs to tell a Terrestrial Radiation Effects in ULSI Devices and Electronic Systems Eishi H. Ibe, 2015-03-02 compelling story This book provides the reader with knowledge on a wide variety of radiation fields and their effects on the electronic devices and systems The author covers faults and failures in ULSI devices induced by a wide variety of radiation fields including electrons alpha rays muons gamma rays neutrons and heavy ions Readers will learn how to make numerical models from physical insights to determine the kind of mathematical approaches that should be implemented to analyze radiation effects A wide variety of prediction detection characterization and mitigation techniques against soft errors are reviewed and discussed The author shows how to model sophisticated radiation effects in condensed matter in order to quantify and control them and explains how electronic systems including servers and routers are shut down due to environmental radiation Provides an understanding of how electronic systems are shut down due to environmental radiation by constructing

physical models and numerical algorithms Covers both terrestrial and avionic level conditions Logically presented with each chapter explaining the background physics to the topic followed by various modelling techniques and chapter summary Written by a widely recognized authority in soft errors in electronic devices Code samples available for download from the Companion Website This book is targeted at researchers and graduate students in nuclear and space radiation semiconductor physics and electron devices as well as other areas of applied physics modelling Researchers and students interested in how a variety of physical phenomena can be modelled and numerically treated will also find this book to present helpful methods Decision Making under Uncertainty Kerstin Preuschoff, Peter N. C. Mohr, Ming Hsu, 2015-06-16 Most decisions in life are based on incomplete information and have uncertain consequences To successfully cope with real life situations the nervous system has to estimate represent and eventually resolve uncertainty at various levels A common tradeoff in such decisions involves those between the magnitude of the expected rewards and the uncertainty of obtaining the rewards For instance a decision maker may choose to forgo the high expected rewards of investing in the stock market and settle instead for the lower expected reward and much less uncertainty of a savings account Little is known about how different forms of uncertainty such as risk or ambiguity are processed and learned about and how they are integrated with expected rewards and individual preferences throughout the decision making process With this Research Topic we aim to provide a deeper and more detailed understanding of the processes behind decision making under uncertainty
