China's Regulatory State Roselyn Hsueh Romano, 2011-10-15 Today's China is governed by a new economic model that marks a radical break from the Mao and Deng eras it departs fundamentally from both the East Asian developmental state and its own Communist past It has not however adopted a liberal economic model China has retained elements of statist control even though it has liberalized foreign direct investment more than any other developing country in recent years This mode of global economic integration reveals much about China's state capacity and development strategy which is based on retaining government control over critical sectors while meeting commitments made to the World Trade Organization In China's Regulatory State Roselyn Hsueh demonstrates that China only appears to be a more liberal state even as it introduces competition and devolves economic decisionmaking the state has selectively imposed new regulations at the sectoral level asserting and even tightening control over industry and market development to achieve state goals By investigating in depth how China implemented its economic policies between 1978 and 2010 Hsueh gives the most complete picture yet of China's regulatory state particularly as it has shaped the telecommunications and textiles industries Hsueh contends that a logic of strategic value explains how the state with its different levels of authority and maze of bureaucracies interacts with new economic stakeholders to enhance its control in certain economic sectors while relinquishing control in others Sectoral characteristics determine policy specifics although the organization of institutions and boom bust cycles influence how the state reformulates old rules and creates new ones to maximize benefits and minimize costs after an initial phase of liberalization This pathbreaking analysis of state goals government business relations and methods of governance across industries in China also considers Japan's South Korea's and Taiwan's manifestly different approaches to globalization

The Changing Role of the Korean State Hong Yung Lee,Sunil Kim,2016-10-20 How and why has the Korean state changed its way of handling the society and its markets over the past two decades The Changing Role of the Korean State finds that the explosion of contentious civil society after democratization coeval with the outbreak of the financial crisis following rapid economic growth are closely associated with the decline of developmentalism Despite these profound changes however the Korean state has not totally relinquished its control over the society and the market Rather although its methods have been altered it remains to be highly interventionalist and regulatory in nature The state continues to use its influence to restructure the socio economic system and rationally manage spatial arrangements The book amply demonstrates the residual legacy of the developmental state in Korea and it is unlikely that Korea will ever accept the western liberalist concept of a state which limits its function to that of a referee for the spontaneous operation of the civil society and the market The contributors of this edited volume delineate the shifting role of the Korean state from the developmental state which led economic development by guiding investment in strategic industries through various means to a slightly subtler role as a regulator supervising the operation of the market in the changing economic environment Individual chapters presented here address this changing but nonetheless vital role that the state plays in managing the variety of modern socio economic life in South Korea Hong Yung Lee is Professor Emeritus of Political Science at University of California Berkeley Sunil Kim is Assistant Professor of International Studies at Kyung Hee University
