memory is modeled by fractional Brownian diffusion Therefore the book constructs diffusion models with memory and provides simple and suitable parameter estimation methods in these models making it a valuable resource for all researchers in this field The book is addressed to specialists and researchers in the theory and statistics of stochastic processes practitioners who apply statistical methods of parameter estimation graduate and post graduate students who study mathematical modeling and statistics

Structures and Dynamics of Asphaltenes Oliver C. Mullins,Eric Y. Sheu,2013-11-11 The investigative assault upon the enigmatic asphaltenes has recently resulted in significant advances in many varied disciplines Taken individually each discipline exposes certain facets of asphaltenes but each alone can never reveal asphaltenes from all vantages Even seemingly narrowly focused issues such as the molecular structures of asphaltenes or the colloidal structures of asphaltenes require a confluence of many lines of investigation to yield an understanding which differs from truth by diminishing uncertainty An holistic treatment of the asphaltenes is a powerful approach to evolve further their understanding For example

examination of asphaltenes at the highest resolution yields molecular structure A slight increase in scale probes asphaltene colloidal structure Weaving together asphaltene studies performed at different length scales results in a fabric which envelops an encompassing vision of asphaltenes At the same time the interfaces of these hierarchical studies provide additional constraints on imagination more than investigations at individual length scales alone These considerations shaped the timing format and the content of our book The editors are very appreciative of the diligence and hard work manifest in each of the contributed chapters herein We thank the contributing authors for making this project a success Oliver C Mullins Eric Y Sheu vii CONTENTS I Asphaltenes Types and Sources
