Algebraic Geometry IV A.N. Parshin, I.R. Shafarevich, 2012-12-06 The problems being solved by invariant theory are far reaching generalizations and extensions of problems on the reduction to canonical form of various is almost the same thing projective geometry objects of linear algebra or what Invariant theory has a ISO year history which has seen alternating

periods of growth and stagnation and changes in the formulation of problems methods of solution and fields of application In the last two decades invariant theory has experienced a period of growth stimulated by a previous development of the theory of algebraic groups and commutative algebra It is now viewed as a branch of the theory of algebraic transformation groups and under a broader interpretation can be identified with this theory We will freely use the theory of algebraic groups an exposition of which can be found for example in the first article of the present volume We will also assume the reader is familiar with the basic concepts and simplest theorems of commutative algebra and algebraic geometry when deeper results are needed we will cite them in the text or provide suitable references
