Curriculum Review, 1983

Communication and Creativity in the Math Classroom Nicholas J. Rinaldi, 2013-12-03 Whether you are a new or an experienced teacher Communication and Creativity in the Math Classroom provides you with classroom tested activities and ideas which are motivating engaging and meaningful to students Traditional textbooks commonly feature conventional un engaging and somewhat boring problems and activities Communication and Creativity in the Math Classroom provides you with activities and ideas which stress life skills such as communicating more effectively being creative analyzing a variety of problems following directions and working cooperatively with others These skills are very valuable but are rarely addressed in the traditional math curriculum The materials and ideas in this book allow you to interject these skills into your daily lessons while covering various mathematical topics Many of the easily reproducible activities can be used as assessments consequently suggested scoring rubrics are included as well as helpful strategies and observations

Sociocultural Research on Mathematics Education Bill Atweh, Helen Forgasz, Ben Nebres, 2013-03-07 This volume the first to bring together research on sociocultural aspects of mathematics education presents contemporary and international perspectives on social justice and equity issues that impact mathematics education In particular it highlights the importance of three interacting and powerful factors gender social and cultural dimensions Sociocultural Research on Mathematics Education An International Perspective is distinguished in several ways It is research based Chapters report on significant research projects present a comprehensive and critical summary of the research findings and offer a critical discussion of research methods and theoretical perspectives undertaken in the area It is future oriented presenting recommendations for practice

and policy and identifying areas for further research It deals with all aspects of formal and informal mathematics education and applications and all levels of formal schooling As the context of mathematics education rapidly changes with an increased demand for mathematically literate citizenship an increased awareness of issues of equity inclusivity and accountability and increased efforts for globalization of curriculum development and research questions are being raised more than ever before about the problems of teaching and learning mathematics from a non cognitive science perspective This book contributes significantly to addressing such issues and answering such questions It is especially relevant for researchers graduate students and policymakers in the field of mathematics education
