making will influence those future generations Markets and democracies focus on the present and therefore tend to make us
forget that we are living in the present with ancestors preceding and descendants succeeding us Markets are excellent
devices to equate supply and demand in the short term but not for allocating resources between current and future
generations since future generations do not exist yet Democracy is also not applicable for future generations since citizens
vote for candidates who will serve members of their i e the current generation In order to overcome these shortcomings the
authors discusses imaginary future generations and future ministries in the context of current decision making in fields such
as the environment urban management forestry water management and finance The idea of imaginary future generations
