

Shipping and Docking Containers
 From 1975 to 1979, the U.S. Coast Guard's Marine Safety Council reported that 1,100 containers were lost overboard from ships. The loss of containers is a major problem for the shipping industry. The U.S. Coast Guard is working with the shipping industry to develop a system of container tracking and identification. This system will allow the Coast Guard to locate and recover lost containers more quickly and efficiently. The system will also help to prevent the loss of containers in the first place. The U.S. Coast Guard is currently testing the system on a number of ships. The system is expected to be fully operational by 1985.
