

## Practice Set 1: Descriptive Statistics

### Question 1: Understanding the Central Tendency of Interrupted Sales

1. In a dataset representing actual sales and order times, the:
- data are grouped using continuous intervals.
  - data are grouped using only one interval category.
  - data are organized with respect to classes.
  - data used are not distinct categories.
2. Understanding of local performance from a value that reflects negatively because:
- the pattern of variation goes on being generally better as (local) success is higher.
  - local performance is negatively related.
  - local performance is positively related to local sales change because stability.
  - local performance decreases during regression.
3. The measure of local variation's economic significance (local) performance is:

| Measure of Variation | Measure of Variation | Measure of Variation | Measure of Variation |
|----------------------|----------------------|----------------------|----------------------|
| Standard Deviation   | 1.0000               | 1.0000               | 1.0000               |
| Variance             | 1.0000               | 1.0000               | 1.0000               |
| Range                | 1.0000               | 1.0000               | 1.0000               |
| Skewness             | 1.0000               | 1.0000               | 1.0000               |
| Kurtosis             | 1.0000               | 1.0000               | 1.0000               |

Interpret the likely central tendency of the distribution and describe the pattern of variation in the data. (Note: the distribution is not normal, but the pattern of variation is not normal.)

|                    | Measure of Variation | Measure |
|--------------------|----------------------|---------|
| Standard Deviation | 1.0000               | 1.0000  |
| Variance           | 1.0000               | 1.0000  |
| Range              | 1.0000               | 1.0000  |
| Skewness           | 1.0000               | 1.0000  |

Note: the distribution is not normal.
