The Purloined Punch Line Jerry Aline Flieger, 1991 **Bulletin of the Atomic Scientists**, 1971-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **A Journey Through The Realm of Numbers** Menny Aka, Manfred Einsiedler, Thomas Ward, 2020-10-03 This book takes the reader on a journey from familiar high school mathematics to undergraduate algebra and number theory The journey starts with the basic idea that new number systems arise from solving different equations leading to abstract algebra Along this journey the reader will be exposed to important ideas of mathematics and will learn a little about how mathematics is really done Starting at an elementary level the book gradually eases the reader into the complexities of higher mathematics in particular the formal structure of mathematical writing definitions theorems and proofs is introduced in simple terms The book covers a range of topics from the very foundations numbers set theory to basic abstract algebra groups rings fields driven throughout by the need to understand concrete equations and problems such as determining which numbers are sums of squares Some topics usually reserved for a more advanced audience such as Eisenstein integers or quadratic reciprocity are lucidly presented in an accessible way The book also introduces the reader to open source software for computations to enhance understanding of the material and nurture basic programming skills For the more adventurous a number of Outlooks included in the text offer a glimpse of possible mathematical excursions This book supports readers in transition from high school to university mathematics and will also benefit university students keen to explore the beginnings of algebraic number theory It can be read either on its own or as a supporting text for first courses in algebra or number theory and can also be used for a topics course on Diophantine equations *The Logic of Invention* Roy Wagner, 2019-02-15 In this long awaited sequel to *The Invention of Culture* Roy Wagner tackles the logic and motives that underlie cultural invention Could there be a single logical factor that makes the invention of the distinction between self and other possible much as specific human genes allow for language Wagner explores what he calls the reciprocity of perspectives through a journey between Euro American bodies of knowledge and his in depth knowledge of Melanesian modes of thought This logic grounds variants of the subject object transformation as Wagner works through examples such as the figure ground reversal in Gestalt psychology Lacan's theory of the mirror stage formation of the Ego and even the self recursive structure of the aphorism and the joke Juxtaposing Wittgenstein's and Leibniz's philosophy with Melanesian social logic Wagner explores the cosmological dimensions of the ways in which different societies develop models of self and the subject object distinction The result is a philosophical tour de force by one of anthropology's greatest mavericks **The Transformative Philosophical Dialogue** Shai Tubali, 2023-09-25 This book explores dialogue as a transformative form of philosophical practice by unveiling the method behind the unique dialogue developed by mystic and thinker Jiddu Krishnamurti 1895-1986 While Krishnamurti

himself generally rejected the cultivation of systems and techniques Shai Tubali argues that there are easily identifiable patterns through which Krishnamurti strove to realize his dialogical aims For this reason he refers to this method whose existence has evaded Krishnamurti's followers and scholars alike as the Krishnamurti dialogue He suggests that these discursive patterns serve to broaden our understanding of the possibilities of philosophical and religious dialogues and further illuminate established forms of dynamic discourse such as the Socratic method Inspired by Pierre Hadot's revolutionary reading of the classical Greco Roman texts the author centers his attention on Plato's Socratic dialogues and the guru-disciple conversations in the Hindu Upanishads which fall within the scope of what may be termed the transformative dialogue dialogues that have been written with the intention of bringing about a transformation in the mind of the interlocutor and reader and reorienting their way of life This text appeals to students as well as researchers and suggests that the Krishnamurti dialogue is not only a continuation and development of the transformative dialogue but that it also amalgamates ingredients of classical Western philosophy and South Asian mysticism Moreover this type of dialogue encourages readers to revisit the lost practice of transformative philosophy in that it reveals new pathways of philosophical and religious inquiry that bear thought provoking practical implications
