Environments in Science Fiction Susan M. Bernardo, Donald E. Palumbo, C.W. Sullivan III, 2014-03-26 The all new essays in this book respond to the question How do spaces in science fiction both built and unbuilt help shape the relationships among humans other animals and their shared environments Spaces as well as a sense of place or belonging play major roles in many science fiction works This book focuses especially on depictions of the future that include but move beyond dystopias and offer us ways to imagine reinventing ourselves and our perspectives especially our links to and views of new environments There are ecocritical texts that deal with space place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two

Nineteen Eighty-Four: Science Between Utopia and Dystopia E. Mendelsohn, H. Nowotny, 2012-12-06 Just fifty years ago Julian Huxley the biologist grandson of Thomas Henry Huxley published a book which easily could be seen to represent the prevailing outlook among young scientists of the day *If I were a Dictator* 1934 The outlook is optimistic the tone playfully rational the intent clear allow science a free hand and through rational planning it could bring order out of the surrounding social chaos He complained however At the moment science is for most part either an intellectual luxury or the paid servant of capitalist industry or the nationalist state When it and its results cannot be fitted into the existing framework it and they are ignored and furthermore the structure of scientific research is grossly lopsided with over emphasis on some kinds of science and partial or entire neglect of others pp 83 84 All this the scientist dictator would set right A new era of scientific humanism would provide alternative visions to the traditional religions with their Gods and the civic religions such as Nazism and fascism Science in Huxley's version carries in it the twin impulses of the utopian imagination Power and Order Of course it was exactly this vision of science which led that other grand son of Thomas Henry Huxley the writer Aldous Huxley to portray scientific discovery as potentially subversive and scientific practice as ultimately enslaving
