Marlin-Bennett, 2012-03-12 International Relations have rarely been considered a synthesis of humanistic and social sciences approaches to understand the complex connections of a global and globalizing world One of the few scholars to have accomplished this creative blend was Hayward R Alker Alker and IR presents a set of visionary and original essays from scholars who have been profoundly influenced by Alker's approach to global studies They build on the foundation he laid demonstrating the practicality and usefulness of ethically grounded theoretically informed and interdisciplinary research for producing knowledge They show how substantive boundaries can be crossed and methodological rules rewritten in the search for a deeper more contextualized approach to global politics This book will be of interest to researchers and students of international relations and global politics NATO's Security Discourse After the Cold War Andreas Behnke, 2013 This

book provides a critical investigation into the discursive processes through which the North Atlantic Treaty Organisation NATO reproduced a geopolitical order after the end of the Cold War and the demise of its constitutive enemy the Soviet Union *China in the UN Security Council Decision-making on Iraq* Suzanne Xiao Yang, 2013 With the rupture of the UN Security Council in March 2003 over the US spearheaded intervention in Iraq the attempts made to subject the use of force to the rule of law had failed Widespread European US disagreement of the role of the UNSC has hindered more effective decisions for China and its European and American counterparts in the Security Council Iraq China and the UN Security Council examines the role of China's policy behaviour in relation to the Iraq intervention in order to develop a better understanding of this fast rising power within the UN It looks at key questions such as What consequences may arise if China's actions are based on a set of values and national interests far removed from those of the major Western powers Could China's attitude disrupt the traditional working and normative practice of the United Nations The book will be of interest to scholars and students of international relations and Chinese Politics **Border Politics** Cengiz Günay, Nina

Witjes, 2016-12-09 In the light of mass migration the rise of nationalism and the resurgence of global terrorism this timely volume brings the debate on border protection security and control to the centre stage of international relations research

Rather than analysing borders as mere lines of territorial demarcation in a geopolitical sense it sheds new light on their changing role in defining and negotiating identity authority security and social and economic differences Bringing together innovative and interdisciplinary perspectives the book examines the nexus of authority society technology and culture while also providing in depth analyses of current international conflicts Regional case studies comprise the Ukraine crisis Nagorno Karabakh the emergence of new territorial entities such as ISIS and maritime disputes in the South China Sea as well as the contestation and re construction of borders in the context of transnational movements Bringing together theoretical empirical and conceptual contributions by international scholars this Yearbook of the Austrian Institute for International Affairs offers novel perspectives on hotly debated issues in contemporary politics and will be of interest to researchers graduate students and political decision makers alike

Power, Realism and Constructivism Stefano Guzzini, 2013-03-20 Framed by a new and substantial introductory chapter this book collects Stefano Guzzini's reference articles and some less well known publications on power realism and constructivism By analysing theories and their assumptions but also theorists following their intellectual paths his analysis explores the diversity of different schools and moves beyond simple definitions to explore their intrinsic tensions and fallacies Guzzini's approach to the analysis of power within and outside International Relations provides the common theme of the book through which the theoretical state of the art in IR is reassessed A novel analysis of power and the potential limits of realism and constructivism in International Relations *Power Realism and Constructivism* will be of interest to students and scholars of international relations international political economy social and political theory and the study of power

Justice, Order and Anarchy Alex Prichard, 2013-05-02 This book provides a contextual account of the first anarchist theory of war and peace and sheds new light on our contemporary understandings of anarchy in International Relations Although anarchy is arguably the core concept of the discipline of international relations scholarship has largely ignored the insights of the first anarchist Pierre Joseph Proudhon Proudhon's anarchism was a critique of the projects of national unification universal dominion republican statism and the providentialism at the heart of enlightenment social theory While his break with the key tropes of modernity pushed him to the margins of political theory Prichard links Proudhon back into the republican tradition of political thought from which his ideas emerged and shows how his defence of anarchy was a critique of the totalising modernist projects of his contemporaries Given that we are today moving beyond the very statist processes Proudhon objected to his writings present an original take on how to institutionalise justice and order in our radically pluralised anarchic international order Rethinking the concept and understanding of anarchy *Justice Order and Anarchy* will be of interest to students and scholars of political philosophy anarchism and international relations theory

International Relations Roger D. Spegele, 2014-05-23 International relations theory is witnessing a veritable explosion of works within the areas of modernism and postmodernism yet there has been no attempt to compare these theories and their sources according to a common criterion or logical form This author argues that while these pioneering imaginative and exciting theoretical works are disparate they also share a common thread that seeks to express emancipatory goals for international relations This book provides an in depth critical study of this genre of theorizing that he names Emancipatory International Relations Spegele develops a framework to help the reader understand both the differences and commonalities in modernist and postmodernist emancipatory thinking in International Relations He critically analyzes modernist theories discourses narratives and postmodernist theory and practice feminist emancipatory discourses and postmodernist international discourse and concludes by examining the coherence viability and plausibility of emancipatory discourses in international relations whether modernist or postmodernist This challenging and innovative volume will be of interest to students and researchers of international relations *The Art of World-Making* Harry Gould, 2017-06-26 On its face The Art of World Making focuses on honouring the career of Nicholas Greenwood Onuf and his contributions to the study of international relations of equal importance however while using Onuf s work as their touchstone the contributions to this volume range widely across IR theory making important interventions in some of the most important topics in the field today The volume considers the place of Constructivism and Republicanism in the field of international relations and the contestation that accompanies the question of their place in the field asking What explains the dominance of some forms of Constructivism and the relative lack of influence of other forms What can rule oriented Constructivism the focus here provide our field that other forms of Constructivism have been unable to Into what new and productive directions can Constructivism be taken What are its gaps and what are the resources to remedy those gaps What can Republicanism tell us about ongoing issues in international law global governance liberalism and crisis Drawing together essays from some of the leading scholars
