intermediate you will be provided with a list of pre-calculations. Unfortunately, the calculations follow off the notebook. It will be your task to identify the important parts. The original goals will be to identify the correct identification of each calculation. In addition, you will be the researcher involved in the calculation. The goal is to identify the correct calculation.

One important class of chemical reactions is double displacement reactions. These occur when elements (and) compounds undergo trading of negative ions. For example, in the following double displacement reaction, the products are:
