Environments in Science Fiction Susan M. Bernardo, Donald E. Palumbo, C.W. Sullivan III, 2014-03-26 The all new essays in this book respond to the question How do spaces in science fiction both built and unbuilt help shape the relationships among humans other animals and their shared environments Spaces as well as a sense of place or belonging play major roles in many science fiction works This book focuses especially on depictions of the future that include but move beyond dystopias and offer us ways to imagine reinventing ourselves and our perspectives especially our links to and views of new environments There are ecocritical texts that deal with space place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two

Nineteen Eighty-Four: Science Between Utopia and Dystopia E. Mendelsohn, H. Nowotny, 2012-12-06 Just fifty years ago Julian Huxley the biologist grandson of Thomas Henry Huxley published a book which easily could be seen to represent the prevailing outlook among young scientists of the day *If I were a Dictator* 1934 The outlook is optimistic the tone playfully rational the intent clear allow science a free hand and through rational planning it could bring order out of the surrounding social chaos He complained however At the moment science is for most part either an intellectual luxury or the paid servant of capitalist industry or the nationalist state When it and its results cannot be fitted into the existing framework it and they are ignored and furthermore the structure of scientific research is grossly lopsided with over emphasis on some kinds of science and partial or entire neglect of others pp 83 84 All this the scientist dictator would set right A new era of scientific humanism would provide alternative visions to the traditional religions with their Gods and the civic religions such as Nazism and fascism Science in Huxley's version carries in it the twin impulses of the utopian imagination Power and Order Of course it was exactly this vision of science which led that other grand son of Thomas Henry Huxley the writer Aldous Huxley to portray scientific discovery as potentially subversive and scientific practice as ultimately enslaving

religion **Dystopia** Gregory Claeys, 2017 *Dystopia A Natural History* is the first monograph devoted to the concept of dystopia Taking the term to encompass both a literary tradition of satirical works mostly on totalitarianism as well as real despotisms and societies in a state of disastrous collapse this volume redefines the central concepts and the chronology of the genre and offers a paradigm shifting understanding of the subject Part One assesses the theory and prehistory of dystopia By contrast to utopia conceived as promoting an ideal of friendship defined as enhanced sociability dystopia is defined by estrangement fear and the proliferation of enemy categories A natural history of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms The work of Le Bon Freud and others is used to show how dystopian groups use such emotions Utopia and dystopia are portrayed not as opposites but as extremes on a spectrum of sociability defined by a heightened form of group identity The prehistory of the process whereby enemies are demonised is explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft and the persecution of heresy Part Two surveys the major dystopian moments in twentieth century despotisms focussing in particular upon Nazi Germany Stalinism the Chinese Cultural Revolution and Cambodia under Pol Pot The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular Part Three examines literary dystopias It commences well before the usual starting point in the secondary literature in anti Jacobin writings of the 1790s Two chapters address the main twentieth century texts usually studied as representative of the genre Aldous Huxley's *Brave New World* and George Orwell's *Nineteen Eighty Four* The remainder of the section examines the evolution of the genre in the second half of the twentieth century down to the present Insularity vs. Islomania. Klaiber, 2023-04-12 Master's Thesis from the year 2021 in the subject English Language and Literature Studies Literature grade 1.0 Johannes Gutenberg University Mainz language English abstract This thesis explores three dystopian novels that depict different forms of island societies *The Island of Doctor Moreau* by H. G. Wells 1896 *Lord of the Flies* by William Golding 1954 and *The Wall* by John Lanchester 2019 The author splits his text into two parts a theoretical framework and an analysis The theoretical framework is again subdivided The first section lays the foundation for the analysis of dystopian island settings and explains and discusses important concepts and key terms regarding dystopia and islands Subsequently the author provides an overview of functions that islands can fulfill for a society The second section of the theoretical framework introduces and explains the tools necessary for the analysis of control mechanisms within societies These tools make it possible to uncover how the respective fictional society organises and controls itself For the analysis of control mechanisms and power structures in these societies this thesis draws on various concepts of power proposed by Michel Foucault In the analysis which constitutes the second main part of this thesis the author examines each novel separately in chronological order By systematically applying the guiding questions mentioned in the methodology a detailed analysis of the insular societies depicted in the three novels is
