Enhancing effective public sector governance Audrey H. Legodi, Philna Coetzee, Lourens Erasmus, 2025-04-23 Audit committees are formed to provide impartial advice on matters of governance risk management internal controls and audits performance management compliance and financial reporting It is alarming to see communities deteriorating as a result of poor municipal services despite the fact that existing audit committees serve as independent advisory boards Accountability is key to the success of municipalities individuals opposing the implementation of improved service delivery should be held accountable This book examines the obstacles that hinder audit committees from effectively executing their duties giving a thorough analysis and resolutions to the South African service delivery crisis The

book's use of the IQA method reveals overlooked variables that South African municipalities and audit committees must contemplate. This methodological contribution results in the construction of a literature framework to substantiate the focus of the study through the identified themes. This book offers guidelines for municipal audit committees on executing their roles successfully and ethically. It also practically equips regulators including the National Treasury, provincial treasuries, CoGTA and SALGA with measures to enhance the efficacy of audit committees. Professional bodies and Best Practices Guidance bodies may augment their standards and ethical codes to guide members serving on audit committees. Higher education for public good Nolutando S. Matsiliza, 2023-03-01. This book focuses on the knowledge area of higher education governance, organisational dynamics, leadership and decolonisation. We have observed that governance discourse has been excluded in debates that concern the public good. The construct of public good seeks to support higher education that does not support a capitalist view of profit making, arguably to respond to societal demands and needs such as developmental efforts through academic functions. Higher Education focuses on interconnected multi-disciplinary constructs intending to provide services for the public good. The issue of public good is an interesting construct that puts universities on the spot since they are expected to be responsive to environmental changes and stakeholder needs through the functioning of accountable governance structures. These governance structures are compelled to comply with policy demands within external and internal environmental factors. This experience has exposed universities to systematic challenges that are local, regional and global and which forces them to adapt while serving stakeholders and society. This book will also interrogate the governance of South African public universities in the post-decolonisation era and new demands from stakeholders. 14th Annual Conference Association of Physicians of India, Indian Society of Nephrology, 14th Annual conference Nihon Bōkin Bōbai Gakkai, *14th Annual Conference* Nihon Genshiryoku Sangyō Kaigi, **14th Annual Conference** Australian Society for Reproductive Biology, 72nd Conference,
