Tourism Analysis, 1997 **Marketing of Tourism Experiences** Noel Scott, Eric Laws, Philipp Boksberger, 2013-09-13 This book provides a review of the current theory and practice of experiential tourism and how it is marketed Many societies today are characterised by widespread individual wealth of an order previously confined to the elite with the consequence that ownership of ordinary physical goods is no longer a distinguishing factor Instead people are now seeking the extraordinary with examples being bodies enhanced through surgery personal fitness trainers and in the case of leisure and tourism seeking unique and unusual places to visit and activities to undertake This trend manifests in the increasing consumption of services and the addition of experiential elements to physical goods by businesses aware of societal changes The trend is enhanced by rapidly changing technology and economic production methods providing new sectors of the world's population with access to the consumption experiences that are repeatedly featured in the media This is the experience economy characterised by a search by consumers for fantasies feelings and fun This book was based on a special issue of Journal of Hospitality Marketing Management

Battlefield Tourism David William Lloyd,2014-07-31 In the aftermath of the Great War a wave of tourists and pilgrims visited the battlefields cemeteries and memorials of the war The cultural history of this battlefield tourism is chronicled in this absorbing and original book which shows how the phenomenon served to construct memory in Britain as well as in Australia and Canada The author demonstrates that high and low culture tradition and modernism the sacred and the profane were often inter related rather than polar opposites The various responses to the actual and imagined landscapes of battlefields are discussed as well as bereavement and how this was shaped by gender religion and the military experience Individual memory and experience combined with nationalism and imperial identity as powerful forces informing the pilgrim experience But this book not only analyzes travel to battlefields which unsurprisingly paralleled the growth of the modern tourist industry it also looks closely at the transformation of national war memorials into pilgrimage sites and shows how responses both to battlefields and memorials which continue to serve as potent symbols evolved in the years after the Great War
