data allocation and replication Independent Schooling in Post-apartheid South Africa Jacques Du Toit,2004 This paper
presents a quantitative overview of the current South African independent schooling sector Historically research on the
sector has been partial resulting in questions about its current size and profile A recent survey revealed that the sector has
grown considerably since the nineties and that official sources underestimate its size Some popular myths about the sector
being largely white and elitist are dispelled by the study which shows that historically disadvantaged learners currently
constitute more than 70% of all learners and that more than 50% of all schools charge low to average fees However there is
also evidence of new forms of inequity emerging and poor performance in parts of the independent sector of which
roleplayers in the sector should be aware HSRC website **Oswaal UPSC CSE Mains 11 Years Solved Papers**
