One such challenge has to do with academic performance. This book investigates this challenge. It examines the factors that contribute to students' poor performance in the community secondary schools in Tanzania to discern the main factors contributing to their poor performance. Many factors contribute to students' poor performance, such as lack of support from parents on educational issues, teachers' and students' attitudes and perceptions on education, inadequate learning and teaching materials and resources, learning and teaching environments, as well as lack of adequate motivation for teachers and students. Fymat, 2018-11-14 While many African countries lag behind the rest of the industrialised world in scientific and medical research and development, the situation is progressively improving. This is why the Society for the Advancement of Science in Africa was established to contribute to economic advancement and sustainability through science research, education, and innovation. This book provides a selection of papers from the Advancement of Science in Africa's fourth annual conference. The conference was held under the overarching theme of science, technology, and innovation in Africa, with several important sub-themes including, but not limited to, improving health research and disease surveillance, education, collaborating in research responding to epidemic diseases with high mortality in Africa, and promoting women's interest in science careers. The collection illustrates how, although the chapter contributors come from various countries and universities representing their own academic research, they all share a common interest in advancing science, technology, and innovation in Africa.
