Santrock, 2016-09-16 Ebook Life Span Development Global Visions of Violence Jason Bruner, David C.

Kirkpatrick, 2022-12-09 In *Global Visions of Violence* the editors and contributors argue that violence creates a lens, bridge, and method for interdisciplinary collaboration that examines Christianity worldwide in the twentieth and twenty-first centuries. By analyzing the myriad ways violence, persecution, and suffering impact Christians and the imagination of Christian identity globally, this interdisciplinary volume integrates the perspectives of ethicists, historians, anthropologists, and ethnographers to generate new conversations. Taken together, the chapters in this book challenge scholarship on Christian growth that has not accounted for violence while analyzing persecution narratives that can wield data toward partisan ends. This allows *Global Visions of Violence* to push urgent conversations forward, giving voice to projects that illuminate wide and often hidden landscapes that have been shaped by global visions of violence and seeking solutions that end violence and turn toward the pursuit of justice, peace, and human rights among suffering Christians. *A Scientific Bibliography of the*

Drakensberg, Maloti and Adjacent Lowlands Rodney Moffett, 2021-04-19 This bibliography includes scientific articles on the Drakensberg, Maloti, and Adjacent Lowlands published between 1808 and 2019. Although focussing on material appearing in accredited journals, there is such a wealth of information in the form of unpublished yet traceable reports, documents, presentations, and dissertations; these are also included. The bibliography has two parts: a complete list arranged alphabetically and the same references arranged in 33 different disciplines. These range from Palaeobotany with 17 entries to Rock Art with 502 entries. **Perspectives on Environmental History in East Asia** Ts'ui-jung Liu, Micah

Muscolino, 2021-02-23 This edited volume engages with some of the most dynamic themes in current research on East Asian environmental history, including agricultural science, war, and the environment, imperial forestry, oceanic history, and the history of energy. Chapters in this book supply an overview of environmental history as a rapidly expanding field continuing to generate valuable insights into the mutually constitutive relationship between human societies and the biophysical environment. The book is divided into three parts. Part I consists of three chapters related to land use, while Part II includes five chapters that focus on water, a topic of perennial concern among environmental historians of East Asia, especially as it relates to irrigation, food production, and marine fisheries. Part III consists of two chapters discussing the impact of new technologies on air quality, in addition to the history of energy in East Asia, which has emerged as an important area of inquiry at the intersection between both environmental history and the history of science and technology. *Perspectives on Environmental History in East Asia: Changes in the Land, Water, and Air* will appeal to students and scholars of East Asian
