Brahm Fleisch

2014 Xitsonga Final Examination Grade11:

The Education Triple Cocktail Brahm Fleisch, 2018-08-15 The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching and learning for schoolchildren living in working class poor and remote rural communities in resource constrained systems like South Africa At the core of this book is the theory and evidence for a powerful new interlocking and mutually reinforcing change model Inspired by the AIDS treatment story the three pronged approach of structured daily lesson plans appropriate and high quality educational materials and one on one instructional coaching to help teachers transform their instructional practices in early grade classrooms shows that it will improve learning outcomes For education systems defined by low levels of early grade learning and profoundly unequal outcomes The Education Triple Cocktail offers a theoretically informed evidence based way forward This book will be of immense use to teachers students of Education policymakers and parents *Tone Orthography and Literacy* David Roberts, Stephen L. Walter, 2021-07-15 This book presents the results of a series of literacy experiments in ten Niger Congo languages representing four language families and spanning five countries It asks the research question To what extent does full tone marking contribute to oral reading fluency comprehension and writing accuracy and does that contribution vary from language to language One of the main findings is that the ethno literacy profile of the language community and the social profile of the individual are stronger predictors of reading and writing performance than are the linguistic and orthographic profiles of the language Our data also suggest that full tone marking may be more beneficial for less educated readers and those with less experience of L1 literacy The book will bring practical help to linguists and literacy specialists in Africa and beyond who are helping to develop orthographies for tone languages It will also be of interest to cognitive psychologists exploring the reading process and researchers investigating writing systems
