Danger in Police Culture Gráinne Perkins, 2023-12-11 Through ethnographic research in South Africa this book explores the lived experiences of police navigating danger and death

Global Responses to Domestic Violence Eve S. Buzawa, Carl G. Buzawa, 2017-06-19 This volume addresses the varied response to domestic violence in a comparative international context The chapters are laid out in a consistent format to cover the nature of the domestic violence problem theoretical explanations the criminal justice response as well as health care and social service interventions in each country The intent of the book is to provide an introduction to the attitudes and responses to domestic violence in various regions to provide meaningful comparisons and share information on best practices for different populations and regions There are considerable variations to domestic violence approaches across cultures and regions In some places it is considered a private or family matter which can help it perpetuate At the same time the United States approach to domestic violence has been criticized by some as being too focused on the criminal justice system rather than other types of interventions which aim to keep families intact This comprehensive work aims to highlight innovative approaches from several regions important cultural sensitivities and concerns and provide analysis to identify the strengths and weakness of various approaches This work will be of interest to researchers in criminology and criminal justice as well as related fields who deal with domestic violence and violence against women including sociology and social work and international justice Practitioners and policymakers will also find it informative

European Journal of Policing Studies, 2018-07-31 Contents Introduction Antoinette Verhage Lieselot Bisschop and Wim Hardyns br Articles How to Police a Porous Fortress Monica den Boer 1 Abstract The purpose of this article is to provide an overview of the way in which the European Union has gradually but steadily built a security architecture based on the control of mobility and borders Different logics of policing are interwoven in several projects which are strongly interdependent with technological innovation Furthermore the European policing of mobility is primarily performed by mounting surveillance both inside and beyond European borders by means of which all forms of movement transactions travelling etc are subjected to intensive monitoring by multiple actors who are interlinked through strategies and systems The main finding is that border policing is shifting in a fundamental way from fixed to fluid from territorial to virtual and from physical to technological Hence paradoxically though mobility is strongly

promoted as one of the main virtues of the European Union Europe's precautionary protection may be at ill ease with the free movement of people The article seeks to stimulate the knowledge and debate about deeper shifts in Europe's security apparatus and develops this from a law enforcement perspective Keywords Europe borders security mobility technology 1 Academic Dean at the Police Academy of The Netherlands Member of the Committee on European Integration of the Advisory Council on International Affairs and Visiting Professor at the College of Europe in Bruges Police Science in Germany History and New Perspectives Joachim Kersten 1 and Ansgar Burchard 2 Abstract In the German speaking academic world Police Science Polizeiwissenschaft is a fairly new and little known area of social science Accordingly the academic status of police science is anything but firmly established but rather at a hybrid stage of development The very combination of policing and academic study research seems to remain largely incompatible not only to police managers but also to main stream sociology German police science differs substantially from the Anglo American Australian approach One main difference pertains to legal traditions others are due to historical and cultural developments that will be taken up in this descriptive essay However Anglo American Australian police theories have a lot to offer to German and European police scientists and this will be demonstrated For a future common approach to an evolving European police science similar descriptions will be required from other European countries to establish a comparative foundation of joint EU police studies Some of the principal dimensions of such a comparison will be sketched in this essay It concludes with a presentation of empirically based police studies carried out by instructors and Master students at the newly founded German Police University in Münster Topics are media coverage of clashes between police and demonstrators a typology of third party intervention in cases of assault in public places and COREPOL EU FP7 a comparative security research project aiming at an improvement of police minority relations through means of restorative justice programs Keywords Police Science in Germany accountability YouTube public relations Facebook civil courage violent assaults 1 Professor and Head of Department of the Department of Police Science at the German Police University Germany DAAD Professor at Northwestern University and guest professor in Maastricht NL in Sydney Australia and in Tokyo Japan 2 Senior Researcher for COREPOL EU FP7

Superabsorbent Polymers Aiqin Wang, Yongfeng Zhu, 2025-09-12 This book introduces in detail the development history synthesis methods physicochemical properties and the main application in agriculture hygiene construction environmental management bioscience and more based on the multiple properties including absorption flexibility elasticity sensitivity etc Edited by experts in the area the book also highlights the biodegradability commercial viability and market potential of SAPs SAP composites the feasibility of using biomass as raw materials for SAP production This well rounded consideration of the topic makes this book suitable for a range of academic professionals and industry professionals working in polymer science material science and environmental science

OECD Food and Agricultural Reviews Innovation, Agricultural Productivity and Sustainability in Estonia OECD, 2018-02-13 Estonian agriculture has undergone significant growth and structural change since the 1990s in a

policy and regulatory environment that has been mostly supportive of investment The implementation of the Common Agricultural Policy has contributed to the modernisation of the country s agriculture *Digital Technologies and Applications* Saad Motahhir,Badre Bossoufi,2024-09-02 This book presents volume 2 of selected research papers presented at the fourth International Conference on Digital Technologies and Applications ICDTA 24 Highlighting the latest innovations in digital technologies as artificial intelligence Internet of Things embedded systems chatbot network technology digital transformation and their applications in several areas as Industry 4 0 sustainability energy transition and healthcare the book encourages and inspires researchers industry professionals and policymakers to put these methods into practice

Transito: The Truth behind the Big-Money Robberies Hennie Lochner,Peet van Staden,2023-02-01 This book is an important resource for the cash in transit CIT companies financial services industries and criminal justice system With one of the authors having used convicts of CIT crimes as participants for a PhD study he solicited data from the lived experiences of CIT robbers that reveal their modus operandi which is crucial to combat these robberies The authors reveal how CIT robbers meticulously plan and execute their ambushes collaborating with the sophisticated network of accomplices The book is thus a timely publication that provides information to combat CIT crimes **Contradictions of Democracy** Nicholas Rush

Smith,2019-01-17 Despite being one of the world s most vibrant democracies police estimate between five and ten percent of the murders in South Africa result from vigilante violence This is puzzling given the country s celebrated transition to democracy and massive reform of the state s legal institutions Where most studies explain vigilantism as a response to state or civic failure in *Contradictions of Democracy* Nicholas Rush Smith illustrates that vigilantism is actually a response to the processes of democratic state formation In the context of densely networked neighborhoods vigilante citizens often interpret the technical success of legal institutions for instance the arrest and subsequent release of suspects on bail as failure and work to correct such perceived failures on their own Smith also shows that vigilantism provides a new lens through which to understand democratic state formation Among young men of color in some parts of South Africa fear of extra judicial police violence is common Amid such fear instead of the state seeming protective it can appear as something akin to a massive vigilante organization An insightful look into the high rates of vigilantism in South Africa and the general challenges of democratic state building *Contradictions of Democracy* explores fundamental questions about political order the rule of law and democratic citizenship Folded Synthetic Peptides for Biomedical Applications Alessandro Contini,Jutta

Eichler,2019-09-26 Folded peptides and peptide motifs within proteins are abundant in living organisms where they are essential for the biological activities of the peptides and proteins During the past decades much research has been dedicated to understanding the rules that govern peptide folding Simultaneously a range of strategies have been established for the conformational stabilization of bioactive peptides as well as for the de novo design of peptides with defined secondary structures These methods are either based on the chemical modification of the peptide backbone such as cyclization and

stapled peptides or on the use of a range of non proteinogenic amino acids that in a defined sequential arrangement induce secondary structures peptides Such building blocks include D and other non proteinogenic amino acids as well as beta and gamma amino acids This Research Topic comprises a collection of papers by an international group of 77 scientists with a background in synthetic analytical computational and medicinal chemistry as well as in biochemistry and pharmacology Their research is presented here in a total of 11 papers 8 original research reports and 3 reviews covering diverse aspects of folded synthetic peptides These studies include the preparation and characterization of new peptide monomers with interesting folding properties the synthesis and conformational analysis of non natural peptides as well as the use of folded peptidomimetics as molecular switches Additionally a range of biomedical applications such as antimicrobial anti inflammatory antiangiogenic and immune stimulating activities are also reported We hope this eBook will be a source of inspiration and knowledge for scientist in various disciplines related to folded peptides and their many applications as well as for those who want to learn more about this fascinating field of research
