Medical Image Computing and Computer-Assisted Intervention -- MICCAI 2015 Nassir Navab,Joachim Hornegger,William M. Wells,Alejandro Frangi,2015-09-28 The three volume set LNCS 9349 9350 and 9351 constitutes the refereed proceedings of the 18th International Conference on Medical Image Computing and Computer Assisted Intervention MICCAI 2015 held in Munich Germany in October 2015 Based on rigorous peer reviews the program committee carefully selected 263 revised papers from 810 submissions for presentation in three volumes The papers have been organized in the following topical sections quantitative image analysis I segmentation and measurement computer aided diagnosis machine learning computer aided diagnosis automation quantitative image analysis II classification detection features and morphology advanced MRI diffusion fMRI DCE quantitative image analysis III motion deformation development and degeneration quantitative image analysis IV microscopy fluorescence and histological imagery registration method and advanced applications reconstruction image formation advanced acquisition computational imaging modelling and simulation for diagnosis and interventional planning computer assisted and image guided interventions **An Introduction to Formal Languages and Automata** Linz,2016-01-15 Data Structures Theory of Computation *Enhancing Quality in Higher Education* Ray Land,George Gordon,2013-06-19 Interest in the quality of higher education provision has been steadily increasing over the last twenty years This has been driven largely by the international creation of explicit policies and reporting requirements to review audit and evaluate provision The interest is associated in many countries with the granting by governments of greater autonomy to higher education institutions This crucially comes bound with increased requirements for accountability in the exercise of such power Enhancing provision promoting innovation cultivating exploration and adopting information led approaches to practice are at the very heart of higher education As such quality enhancement comes in many guises and is under constant scrutiny Enhancing Quality in Higher Education looks critically at recent developments in higher education taking snapshots of changing practices around the world and analysing the varied theoretical perspectives of quality enhancement that are emerging The opening section draws upon this theoretical base whilst the second section contextualises it through the analysis of a diverse range of international case studies The concluding section considers future prospects for the enhancement agenda in the light of the international pressures facing all systems of higher education in the future Policy will inevitably be shaped by the historical contexts within which national systems are located The book draws on a wide range of international case studies examined by a host of contributing experts The movement towards quality enhancement can be seen as stimulating action at the grassroots of the academy to self generate improvement It is a counter to the prevalent view that change in higher education is essentially about the institutional response to increasing societal pressure and state control and as such is a welcome contribution to the literature This comprehensive volume is essential reading for anyone involved in higher education and educational policy **The UN**

Convention on the Elimination of All Forms of Discrimination Against Women and its Optional Protocol Patricia Schulz, Ruth Halperin-Kaddari, Beate Rudolf, Marsha A. Freeman, 2022-12-01 This volume is the fully revised and updated version of the first comprehensive commentary on the Convention on the Elimination of All Forms of Discrimination against Women and its Optional Protocol It reflects the developments during the decade following the publication of the first edition in 2012 which has also seen a notable rise in individual complaints more than 85 ten new General Recommendations and six new inquiry procedures as well as numerous statements partly in conjunction with other UN human rights bodies The Convention is a key international human rights instrument and the only one exclusively addressed to women It has been described as the United Nations landmark treaty in the struggle for women s rights At a time when the backlash against women s human rights and the concept of gender based discrimination is increasingly challenged by governments and powerful societal actors the Commentary is an important instrument to hold all state powers to account on their international obligations under the Convention The Commentary analyses the interpretation of the Convention through the work of its monitoring body the Committee on the Elimination of Discrimination against Women It comprises detailed analyses of the Preamble and each article of the Convention and of the Optional Protocol including a separate chapter on the cross cutting substantive issue of violence against women The sources relied on are the treaty language and the general recommendations concluding observations and case law under the Optional Protocol individual complaints and inquiries through which the Committee has interpreted and applied the Convention Each chapter is self contained but the Commentary is conceived of as an integral whole The book also includes an introduction which provides an overview of the Convention and its embedding in the international law of human rights as well as the most recent challenges to women s human rights worldwide

Gender Violence & Human Rights Aletta Biersack, Margaret Jolly, Martha Macintyre, 2016-12-14 The postcolonial states of Fiji Papua New Guinea and Vanuatu operate today in a global arena in which human rights are widely accepted As ratifiers of UN treaties such as the Convention on the Elimination of All Forms of Discrimination against Women and the Convention on the Rights of the Child these Pacific Island countries have committed to promoting women s and girls rights including the right to a life free of violence Yet local national and regional gender values are not always consistent with the principles of gender equality and women s rights that undergird these globalising conventions This volume critically interrogates the relation between gender violence and human rights as these three countries and their communities and citizens engage with appropriate modify and at times resist human rights principles and their implications for gender violence Grounded in extensive anthropological historical and legal research the volume should prove a crucial resource for the many scholars policymakers and activists who are concerned about the urgent and ubiquitous problem of gender violence in the western Pacific This is an important and timely collection that is central to the major and contentious issues in the contemporary Pacific of gender violence and human rights It builds upon existing literature but the contributors to this volume interrogate

the connection between these two areas deeply and more critically This book should and must reach a broad audience Jacqui Leckie Associate Professor Anthropology and Archaeology University of Otago The volume addresses the tensions between human and cultural individual and collective rights as played out in the domain of gender Gender is a perfect lens for exploring these tensions because cultural rights are often claimed in defence of gender oppression and because women often have imposed upon them the burden of representing cultural traditions in attire comportment restraint or putatively cultural conservatism And Melanesia is a perfect place to consider these gendered issues because of the long history of ethnocentric representations of the region because of the extent to which these are played out between states and local cultures and because of the efforts of the vibrant women s movements in the region to develop locally workable responses to the problems of gender violence in these communities Christine Dureau Senior Lecturer Anthropology University of Auckland

Ryan,Lawrence C. Shepley,2015-03-08 Addressing a variety of theoretical cosmological problems and emphasizing a mathematical approach this volume nicely complements Peebles Physical Cosmology Princeton Series in Physics 1971 Ryan and Shepley have concentrated on the structure of models of the universe By using a modern terminology that emphasizes the operator nature of vectors and tensors as opposed to their components in a particular coordinate system the authors

develop modern tensor analysis to the point where it can be applied to general relativistic cosmology They then use it to describe homogeneous cosmologies in considerable detail Both students and researchers are likely to find these techniques especially useful Among their subjects are spaces with groups of motions singularities Taub NUT Misner space Bianchitype models Hamiltonian cosmology and perturbations in anisotropic models A brief section on observations is also included as is a complete bibliography A final section presents graded exercises that underscore the potential yet unrealized in this area of study Originally published in 1975 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Stock-Flow-Consistent Models and Institutional Variety Romar Correa, Amelia Correa, 2019-02-15 Orthodox macroeconomics is founded on microeconomics Heterodox economists either reject micro foundations or experiment with behavioural relationships without paying attention to the principles that generate them The book takes off from Michal Kalecki's aphorism about economics being a science that confused stocks and flows Kalecki was famous for presiding over a marriage between Marx and Keynes and all three figure prominently in the volume However the first part of the title is a homage to Wynne Godley who pioneered stock flow consistent modeling in our times The authors exploit lagged values of variables emerging from the definitions Lags also emerge in so called stock flow norms connecting the aggregates Some moving and shaking of identities and a difference or differential equation emerges The requirements for stability of the dynamic systems are illuminating and the reader can stop at structure and history with the first half of the book The conversation with orthodoxy begins with the second part The equivalent equation systems of the first part throw up different pairs of characters whose happiness must be maximised over time The price to pay through the solution process is the confrontation with many ugly expressions but the explicit calculations are undertaken repeatedly only to reassure students through drillwork that tedium is not the same as difficulty The payoffs are that variable transitions in capitalism the second part of the title are captured from a small clutch of identities The movements from backward agriculture to capitalism from golden age capitalism to financialization are modeled A separate chapter is devoted to Europe The policy prescriptions of heterodox economics do not compare with the richness of critique and positive analysis Positive and normative are one in this work the combination of stock flow norms along with forgotten policy variables like the tax rate promising order and stability to economies
